

# Fentanyl Genocide

## govpusher

*by Miles Mathis*

*August 26, 2024*

If you think the fentanyl “crisis” is just an accident, or a function of bad choices by drug addicts, *listen to this*:

A new program out of the **Department of Defense** and approved by the FDA called EFIC is now administering fentanyl and ketamine *involuntarily* to unconscious patients, like those injured in a car wreck. They are calling this a study, but what are they studying? How many people they can addict to these drugs in this way? And why is this coming out of the Department of Defense? What does trying to cause addiction in people have to do with national defense?

You really have to [read the reports of this](#) to believe it. Say you are in a car wreck and have to be taken by ambulance to a hospital. You are unconscious, so you can't consent to anything. So these EMTs in the ambulance are using “emergency” waivers given to them by DoD to shoot you up with dangerous drugs without your consent, as part of a study? These drugs are not only dangerous, they are completely unnecessary. If you are unconscious, you aren't feeling any pain, are you? So why would you need a pain killer? You don't need a pain killer until you wake up, and once you wake up you can consent. So none of this makes any sense from the first word. And if you did need a pain killer, they have drugs far less dangerous than fentanyl or ketamine. Fentanyl is 40 times more potent than heroin and 100 times more potent than morphine. So why not just use morphine in the ambulance, as they used to? Because fentanyl or ketamine is far more likely to hook you and eventually kill you, as we saw with Matthew Perry.

Yep, Matthew died of ketamine overdose, so he is another casualty of this government program. EFIC is just the tip of the iceberg that got spotted in this huge government program to murder its citizens. In the case of Perry, they are scapegoating a couple of small-time pushers and corrupt doctors to get your eyes off the bigger fish: the government entities in the Pentagon and CIA who are flooding the streets with this stuff on purpose. You are supposed to think it is coming over the border from Mexican or South American cartels, but it isn't. All those bogeymen are just more fronts and ghosts. This stuff on the street is coming from the Feds. They have been doing it for many decades, as we saw in my paper on Manson. Back then it was LSD, PCP, STP, bennies, and a hundred other things. Later Gary Webb showed the CIA was behind the crack epidemic in LA. And it is the same thing now except worse, since it is nationwide and the numbers are staggering. 85,000 people are dying from opioid overdoses every year, almost twice the number dying from car wrecks. That's also double the number of people who died from combat in the entire Vietnam War! Every year.

And we now see it isn't an accident. Your government *wants* you addicted to these drugs, and it wants you dead. It doesn't even care if you are a famous actor whose grandfather was a big banker. They are so intent on getting you hooked they wait until they have you in an ambulance unconscious and shoot you up then.

### Where is this study being done?

This study is being done at the following trauma centers across the country:

- UPMC Presbyterian Hospital and UPMC Mercy Hospital (Pittsburgh, PA)
- Allegheny General Hospital (Pittsburgh, PA)
- Cooper University Hospital (Camden, NJ)
- Froedtert Hospital (Milwaukee, WI)
- UC San Diego Medical Center (San Diego, CA)
- Zuckerberg San Francisco General Hospital (San Francisco, CA)
- University of Cincinnati Medical Center (Cincinnati, OH)
- University of Utah Hospital (Salt Lake City, UT)
- Carolinas Medical Center (Charlotte, NC)
- Robert Packer Hospital (Sayre, PA)
- University of Vermont Medical Center (Burlington, VT)
- University of Wisconsin University Hospital (Madison, WI)

So if you live in one of those cities and drive or bike a lot, you may want to wear a bracelet that says you do not consent to fentanyl or ketamine. Though, knowing these assholes, they will just cut it off and say you lost it in the crash.

You will answer me that none of this proves they are trying to addict people to fentanyl. Really? So why does their own literature say this:

**You will provide your contact information to the study team and fill out a survey on your experience with pain, anxiety and pain medications. The study team will contact you at 3 months and 6 months and ask similar questions about ongoing pain, pain medications, anxiety, and post-traumatic stress disorder.**

Obviously they are fishing to find out if you got addicted. They might as well say they checked in at 3 months and 6 months to see if you were dead yet.

This is where we find ourselves in the USA in 2024. In a war to the death with our own government, except that only they are waging it. They are waging it with fake vaccines, prescription drugs, street drugs, fluoride in the water, thousands of intentional poisons in the food, 24/7 fake events, fake history, fake art, fake science, and continuous gaslighting via a manufactured matrix of lies. It is a full-spectrum war of psychological attrition and “soft” kills.
