An ECG and a Human Heart

An electrocardiogram (ECG) is a graphic tracing of the voltage generated by the cardiac or heart muscle during a heartbeat.

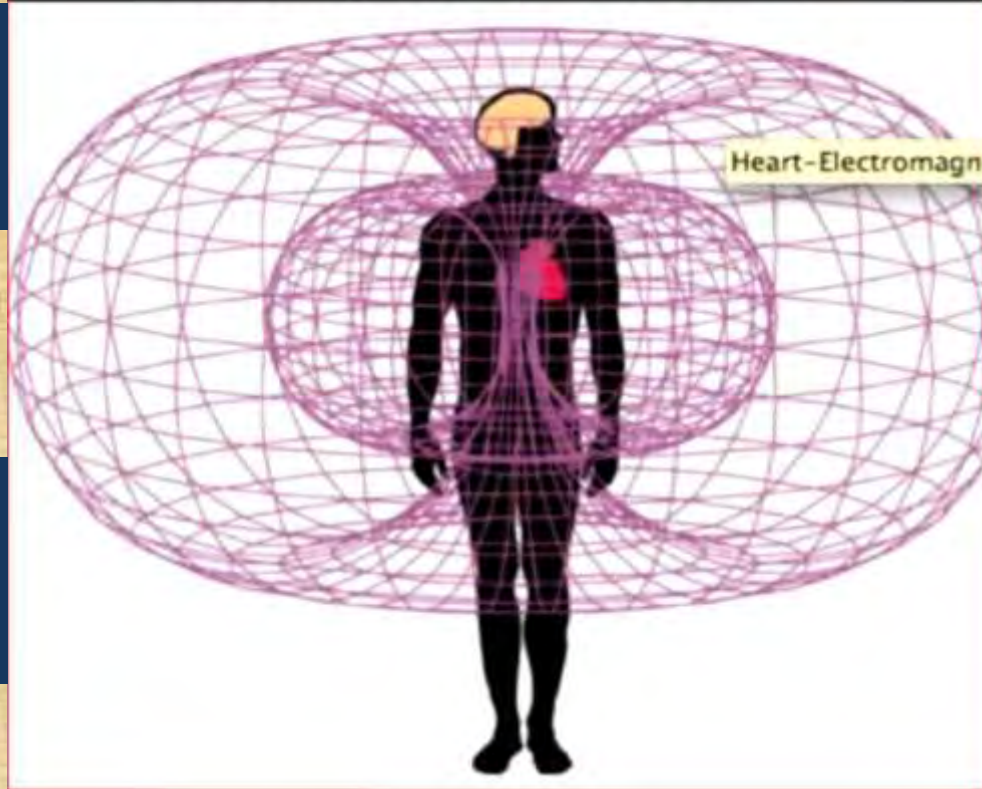

This electrochemical impulse having a voltage potential of about 1 mV spreads out in the heart in such a fashion as to cause the cells to contract and relax in a timely order and, thus, give the heart a pumping characteristic. The voltage potential can be measured at the surface of the body.

All wireless devices emit harmful non-thermal RADIATION

AM & FM radio towers, satellite TV, Amateur Radio, airport radars, police radars, Microwave ovens, cell phones, cell phone towers, iPhones, smart phones, cordless phones, iPads, tablets, Wi-Fi routers (2.4 or 5 GHz) home security systems, baby monitors, laptops, garage door openers, Bluetooth, remote control units, GPS satellites, TETRA Networks (BC Hydro 409-430 MHz: 17.6 Hz), Wi-Max towers (2.3, 2.5, 3.5, 5.8 MHz),

(Cont'd)

Wireless Devices (Cont'd)

military & scientific satellites, motion detectors, Wi-Fi hotspots: cities, towns, buildings, school buses, Greyhound buses, VIA Rail trains, planes, restaurants), body area networks (BANs), Car Wi-Fi; RFIDs (900 MHz), X-rays, CT Scans, MRIs, Pagers, some Copiers, Motion Detectors, Wii & Wii U, and Xbox 360 games. Car-collision avoidance, Smart Meters, Meshed-grid networks, etc.

1932 – “Microwave Sickness” “EHS” Symptoms

**First reported by Germany,
symptoms: headaches, dizziness, disrupted
sleep, insomnia, fatigue, nausea, heart
palpitations, memory loss, tinnitus, skin
rashes, muscle and joint pain, leg and foot
pain, tingling, irritability, numbness,
nosebleeds, depression, anxiety, etc.**

1950s – Microwave Sickness (“EHS”)

Clinics in Moscow, Leningrad & other cities in the Soviet Union and E. Europe study and treat thousands of workers suffering from new occupational disease: “radio wave sickness.”

These workers manufactured, inspected, repaired or operated M/W equipment. Some worked at radar, radio or TV stations or telephone companies. Others operated RF heaters & sealers being used in industries using technology developed during World War II.

1933 – Russian Research

Have been systematically studying electromagnetic bio-effects on all life forms: plants, animals & people since 1933.

Found harmful effects from even the weakest radiation intensities - depended greatly on frequency used and cumulative effect.

Caused the Russians to drastically reduce their own safety levels by a factor of 1,000!

U.S Embassy – Moscow ('53 – '76)

(6-8 Hours a Day, 5 Days Week)

Was irradiated with M/W frequencies at intensities 1,000 times lower than the 1966 US 'standard' but still within Soviet 10 μ W for public exposure!

- 2 ambassadors died of cancer;
- 3rd developed leukemia-like blood disease & bleeding eyes & eventually died from it;
- At least 16 women developed breast cancer;
- Many other staff suffered adverse health effects, e.g. immune system disorders, high white blood cell counts, chromosomal breaks, chronic fatigue, cataracts, etc.
- U.S. KNEW but DIDN'T TELL embassy for at least 10 years!

1954 – Radiation Sterility and Baldness

Bell Laboratories, alarmed by reports of sterility and baldness among its own workers as well as military radar personnel, suggested a safety level of 100 microwatts, a hundred times less than the USA Limit of 10mW/cm² (see Becker & Selden, 1984).

1961 - President Eisenhower's concern about Military-Industrial Complex and Democracy

“In the councils of government, we must guard against the acquisition of unwarranted influence, whether sought or unsought, by the military-industrial complex. The potential for the disastrous rise of misplaced power exists and will persist. Only an alert and knowledgeable citizenry can ... (protect democracy)

1965 – Exposure Limits Czechoslovakia vs USA

The safe exposure limit set for the general public in Czechoslovakia was in the range of $1 \mu\text{W}/\text{cm}^2$ - a thousand times lower than that in the United States ($10 \text{ mW}/\text{cm}^2$) !

<http://www.i-sis.org.uk/FOI3.php>

1980s -

Electromagnetic Radiation

Studies showed links to depression and suicides in England, to cancers in children and adults in Colorado. Occupants of houses with radiant electric heating were subject to increased cancer risk. Sweden & U.S. reported links between cancer in juveniles and proximity to high-voltage power lines, also to Air Force bases.

1977 – Microwaves: Their Deadly Risk ... and the Cover-up

Microwave radiation can blind you, alter your behaviour, cause genetic damage, even kill you. The risks have been hidden from you by the Pentagon, the State Department, and the electronics industry. With this book, the microwave cover-up is ended.

“The Zapping of America” Paul Brodeur (1977)

1985 - The power of the telecom and TV industry

Dr. Robert O. Becker and Brian Selden:
“Our survival depends on the ability of
upright scientists and other people of
goodwill to break the military-industrial
death grip on our policy-making
institutions.”

(Becker, RO, and Selden, G, The Body Electric: Electromagnetism and the
Foundation of Life, (New YorkL Harper) 1985, p.329.)

1994 – Microwave Weapons

Microwave Research Department of the Walter Reed Army Institute of Research states, "Microwave energy in the range 1 to 5 GHz, a militarily important range, penetrates all organ systems of the body and thus puts all organ systems at risk." Effects on the central nervous system are considered very important.

Orvotron, The Bimonthly Newsletter, March/April 1994

Most Dangerous Frequencies!

Frequencies from about 700 MHz to 1,000 MHz interact most efficiently with human tissue to yield the greatest energy Absorption!

(Yet to-day's Cell Phones and Smart Meters operate within this very range!)

Project Pandora

Eldon Byrd, a scientist for the Naval Surface Weapons Centre, USN, said about M/W radiation in 1986: 'We can alter the behaviour of tissues, cells, organs and whole organisms.... you can cause up to six times higher foetus mortality and birth defects in laboratory animals, and these fields are so weak you can hardly detect them...It is known how to induce malignant diseases in human cells ... and how to cure them...'

2005 - Corruption in W.H.O.

On July 5, 2005, it was published that

Dr. Michael Repacholi –

Coordinator of the WHO's Radiation & Environmental Health Unit- *receives \$150,000 a year (via Royal Adelaide Hospital, S.A.) from the cellular phone industry with additional money for meetings and travels.*

(microwavenews.com 5.7.05)

Corruption in WHO

Russian research done in 1960-1985, with real control groups, in real, healthy environments, without the negative influence of the cell-phone industry (such as the publication of the fictional scientific results, disregarding the danger of the radiation, censorship of inconvenient research results), should be considered and added to this project as No. 1 source (reference study) or at least should be included in the WHO's database.

<http://www.iddd.de/umtsno/puzen2.html>

Corruption in WHO

Russian scientists conducted more than 1500 epidemiological and human laboratory studies during the Soviet Union era which are not even in the WHO database (IEEE Study Database or EMF Studies Database). Today, special industries dismiss Russian results in RF (radiofrequencies) research as nonsense science.

<http://www.iddd.de/umtsno/puzen2.htm>

1971 – Warning to U.S. White House

The U.S. President's own Management Advisory Council warned: “power levels in and around American cities, airports and homes may already be biologically significant.” The population at risk “may well be the entire population.” The consequences of undervaluing or misjudging the biological effects of long-term, low-level exposure could become a critical problem for the public health, especially if genetic effects are involved.

1973 – Microwave Radiation – A Potential Threat to Health

Research by NRC Canada and Queen's University produced concerns for the long term, low-intensity *non-thermal* microwave radiation that will result from uncontrolled proliferation of MW devices.

<http://www.emf-risks.com/2013/09/1973-report-researching-effects-of.html>

1976 - Sworn to Silence About non-thermal EMR

U.S. Government advised its western allies
not to talk about non-thermal effects of
microwave radiation. If it did not heat the
body, they were not to talk about it.

1979 – NIOSH & OSHA Warning (National Institute Occupational Safety & Health, and Occupational Safety Health Agency)

Both agencies believe there is sufficient evidence of harmful non-thermal effects to humans, they recommend that PRECAUTIONARY measures be instituted to minimize the risk to workers from unwarranted exposure to RF energy”

1986 - Understanding Microwave Radiation

1990 – U.S. EPA

Environmental Protection Agency

EPA'S "Draft" report recommended EMR be classified 2B "Possible" carcinogen. 33 of 35 international research studies conclusively linked EMR to brain tumours, leukaemia & other forms of cancer, etc., but **Pres. H.W. Bush's White House** quashed recommendation due to pressure from *US Military, Telecom/wireless Industries*.

- EPA was forbidden to research EMR further.
- 1996 – US Telecommunications Act
- 1996 - EPA had funding cut drastically!
- 1996 - EMR was re-assigned to the FCC!

1992 – ICNIRP was born

The International Commission on Non-Ionizing Radiation Protection claims to be an independent scientific organization responsible for providing guidance and advice on the health hazards of non-ionizing radiation exposure, yet considers only the THERMAL effects of EMR as harmful. “If the radiation does not heat the skin, it can’t be harmful!”

1993 - U.S. FDA Food & Drug Administration

2002 - Conflict of Interest IARC / WHO

Then IARC Director, Lorenzo Tomatis plus 30 other scientists from around the world went public claiming IARC had let industry get too involved in the decision-making as to what is or is not cancerous - referring to the downgrading of DEHP, which compromises public health, and that scientific papers showing a possible link to cancer had been "ignored or intentionally suppressed."

2002 - FCC sets M/W limits >10,000 times HIGHER than levels known to cause illness! [Remember: FCC are politically-appointed non-scientists]

BIOINITIATIVE 2007 REPORT

25 scientists, doctors and public health experts from 5 countries released a 650-page document with over 2,000 studies linking RF and EMR to cancer, Alzheimer's disease, DNA damage, immune system dysfunction, cellular damage and tissue reduction. [Implied Health Canada's Exposure Limits were 10,000 times too high!]

2007 – European Parliament

European Environment Agency called on its *27 Member States (500-million people)* to:
“protect the public more effectively by taking ‘Appropriate, precautionary and proportionate actions ... to avoid ... serious threats’

2007 - EMR Suppresses Melatonin

Produced by the Pineal gland, Melatonin is a powerful cancer-fighting hormone produced in the body at night. Sleeping in a room surrounded by our favourite devices – cordless phone, cell phone, digital clock, CD/radio player, computer and TV – can seriously suppress melatonin production.

and more *protection is needed for pregnancy,
newborns, children, and elderly people. ICES* says
world’s Exposure Limits are “inadequate” as

Non-industry Scientists Say

Prof. Yuriy Grigoriev, Chairman of RNCNIRP:
“Man conquered the Black Plague, but now he’s created EMF pollution”

The International Doctors’ Appeal (more than 1,000 doctors): “This is the greatest biomedical experiment in human history ever.”

Dr. Robert O. Becker, Two-time Nobel Nominee said in 2000: “The greatest polluting element in Earth’s environment is the proliferation of EMF.”

Non-industry Scientists (Cont'd)

The 2011 Seletun Scientific Panel: “Global population is at risk. Reduce Exposure Limits 1,000 to 10,000 times.”

Dr. Dietrich Klinghardt: “...exposure to microwave and EMF is significantly harmful to all health and life itself.”

Dr. George Carlo: “There’s a major health crisis coming, probably already underway ... cancers, learning disabilities, ADD, Autism, Alzheimer’s, Parkinson’s, psychological/behavioral problems.”

Non-industry Scientists Say (Cont'd)

“I think it’s becoming the disaster of the 21st century” says Dr. William Rea, one of the foremost experts on EHS disorder in the U.S., a cardiovascular surgeon who has treated patients for EHS disorder for 40 years

<http://kfor.com/2013/07/23/customers-says-oge-smart-meters-making-them-sick/>

Non Industry Scientists (Cont'd)

Dr. Gerard Hyland, a physicist, twice nominated for the Nobel Prize in Medicine, says, "Existing safety guidelines for cell phone towers are completely inadequate ... Quite justifiably, the public remains skeptical of attempts by governments and industry to reassure them that all is well, particularly given the unethical way in which they often operate symbiotically so as to promote their own vested interests."

2010 – Published by Canada's National Research Council (NRC) Press

“Many Canadians are being exposed to dangerous levels of radiation and concluded that a new biologically based guideline is needed, instead of the dangerous, outdated thermal guidelines!”

2010 - Corruption

In April 2010, eminent researchers: Olle Johansson (Sweden), Dr. Annie Sasco (France), Dr. Dimitris Panagopoulos (Greece) and Dr. Andrew Goldsworthy (U.K.) took part in conference before Canada's House of Commons Standing Committee on Health (HESA) outlining the dangers of low level EMR from cell phones, masts and wi-fi with reproductive decreases from cell phone EMR. All were subsequently demoted/punished in some way by their employers.

**2010 – President Obama’s
own Cancer Advisory Panel
urges Precautionary Principle for
EMF**

pointing to cell phones and other wireless technologies as potential causes of cancer, and recommended: When credible evidence exists that there may be a hazard, use PRECAUTIONARY approach.

2011 - European Parliaments

(47 countries – 800 million People)

The Council of Europe and the European Parliament recognize for the first time biological effects of EMF on living plants, animals and human beings. The need now is to protect citizens from EMR, particularly "pregnant women, newborn babies & children."

2012: The Breast Cancer Risk Nobody Talks About – EMR/EMF

Both Powerline (60 Hz) EMFs and radio / microwave electro-magnetic radiation (EMR) significantly disrupt melatonin, convincingly proving “the negative effect of EMFs on the anti-estrogenic effect of melatonin in breast cancer cells,” German scientists find.

2012 - EMR and Pregnant Women

Wireless devices such as phones and laptops used by pregnant women may alter brain development of the fetus. This has been linked in both animal and human studies to hyper-activity, learning and behavior problems.

BioInitiative 2012 Report

EMR, i.e., Microwave radiation, should be classified a “*Human Carcinogen.*” Existing FCC, IEEE and ICNIRP [and Health Canada] guidelines ... do not protect us!

Recommends Exposure Limit for chronic exposure > 3-6 million times lower/safer than Safety Code 6! (i.e. 0.3-0.6 nW/cm² vs 1000 μW/cm²)

2012 - Fragility of Human Brain

The levels of RFR needed to affect the blood-brain-barrier have been shown to be as low as 0.001 W/kg, or less than holding a mobile phone at arm's length. The US FCC standard is 1.6 W/kg; the ICNIRP standard is 2 W/kg of energy (SAR) into brain tissue from cell/cordless phone use. Thus, BBB effects occur at about 1000 times lower RFR exposure levels than the US and ICNIRP limits allow.

Down Syndrome

An increase of Down's syndrome was also found amongst the children of radar operators, and amongst residents near satellite uplinks in the microwave bands in Vernon, NJ (radar and satellite also fall within the microwave band).

Effects of Radar

Radar has also been linked to “internal bleeding, leukemia, cataracts, headaches, brain tumors, heart conditions, and liver involvement with jaundice” at certain power densities.

2013 – Children are at Risk!

On December 12, 2012, the American Academy of Pediatrics sent a letter to the U.S. Federal Communications Commission (FCC) warning of dangers to children because of current radiation Exposure Limits. New standards are needed

2013 - All EMR is Dangerous!

Dr. Martin Blank, two PhDs: Physical Chemistry & Colloid Science says:

“Radio frequency in any form — cell tower radiation, Wi-Fi networks, cell phones etc. — is potentially bad, especially if one is exposed for extended periods (e.g., asleep in bed at home, seated at a desk in school).”

2013 - EHS in Sweden

EHS is considered a *physical impairment* and is recognized as a *disability*. Local governments grant support to individuals with EHS. *Employees with EHS have a right to support from their employers* so as to enable them to work despite this impairment. *Some hospitals in Sweden provide rooms with low EMF exposure.*

Effects of Radiation are Cumulative

The effects of radiation are cumulative, in both senses: 1) The meters add to the cumulative radiation as sources proliferate, and 2) microwave radiation is cumulative in sense of increasing the body's sensitivity over time. Research shows that test subjects don't always recover completely and that subsequent exposures can cause effects at lower levels.

Evidence that EMR and EMF are harmful to all life forms

A body of more than 6,000 studies has been accumulated since the 1930s producing an overwhelming conclusion that exposure to microwave and electromagnetic fields is significantly harmful to all life and health itself.

EMR - The Nuremberg Code

In essence, says: a person being experimented upon must first:

- give their consent - free from *force, fraud, deceit, duress or coercion*;
- have sufficient knowledge of *what is happening*; and
- know the possible effects upon one's health.

It is the responsibility of the electric utility to ensure the public are fully aware of and understand what is happening to them and what, if any, risks to their health might be involved.

EMR is GENOCIDE

“This industry and those parts of governments which are encouraging them will be responsible for killing more people than all those killed in the entire 2nd World War! This will be the worst genocide this planet has ever known – not just people, but plants and animals. The U.K, U.S., Canadian and Australian governments are lying to the public to protect themselves against lawsuits and to make money for industry!”

Cell Phone Towers/Masts

Why are cell towers so dangerous?

Because of the constant pulsed radio frequency radiation, which has been shown in thousands of studies to cause biological damage to the body and is a precursor to diseases (besides cancer) such as:

- Genetic mutations
- Hindered learning
- Insomnia
- Hormonal imbalances
- Dementia
- Memory disruptions
- ADD
- Brain disorders
- Infertility
- Heart complications

1995 - **Dr. Michael Repacholi**

W.H.O. employee & “primary expert”

Promoted BellSouth’s proposed new GSM cell site in New Zealand, but the N.Z. Environment Court rejected his position that *“there was no evidence of adverse effects below the international guidelines because the only effect of RF/MW was tissue heating.”* Dr. Repacholi’s own research proved this was not true, said **Dr. Neil Cherry !**

1996 - CORRUPTION

Congress passed the Telecommunications Act of 1996 which made it illegal for any community to consider health or environment in regulating cell towers.

1999 – Toronto Adopts a “Prudent Avoidance” Policy

Toronto’s Board of Health gave their support to a Prudent Avoidance policy, which recommended that the levels of radio frequency radiation from cell phone towers in the City of Toronto **be kept 100 times below** Safety Code 6 guidelines.

2000 – Cell Towers

Reduce Radiation 10,000 times!

The Salzburg Resolution, adopted in 2000 at the International Conference on Cell Tower Siting, would prohibit any cell site from emanating more than .1 mW/cm² - 10,000 times more strict than the current U.S. standard. This limit takes into account the growing evidence for non-thermal RF bio-effects.

2002 - Cell Towers and Cancer

People living in 5 of the 7 homes surrounding Forest House in Carnarvon Road, South Woodford, which has 16 masts on its roof, have contracted cancer.

2004 - TETRA Cell Phone Tower

One morning in a British primary school, 11 children in various classrooms suddenly and simultaneously developed nose bleeds and nausea for no apparent reason. One child collapsed and was rushed to hospital. Cause?

Weeks later it was found that a TETRA transmitter mast, which had been installed in the village some months earlier – located 75m/210 feet from the school – had been switched on for the first time on that very same disastrous morning!

Cell Phone Towers and House Prices

Cell phone towers also have a terrifying impact on prospective house purchasers or tenants. It is now known that cell phone masts can reduce the sales price of real estate **by 40 - 60%** (if it can be sold at all) and result in rent reductions of **10 - 20%!**

2003 - Swisscom admits the danger but does nothing about it!

Swisscom, the leading telecom provider in Switzerland, reveals the true DANGER of Wi-Fi in a patent application. It devised a way to reduce the microwave radiation from Wi-Fi LANs

In its patent application, Swisscom clearly states the elevated risk of cancer and genetic damage from the constant low level microwave/RF exposure from Wi-Fi.

Smart Meters vs Cell Phones

Fortis says: “On average, a meter transmits customer data 4 to 6 times a day, for a total average of one minute per day.”

Pacific Gas & Electric admitted in a California Court of Law that meters pulse on average **14,000 times/day** to a max of **190,000/day**.

Who is telling the truth?

San Diego Gas and Electric Company (SDGE) responded to an Administrative Judge's enquiry that smart meters installed by SDGE transmit messages on average 1270 times/day and at a maximum 25,920 times/day.

www.pikeresearch.com/newsroom/smart-appliance-market-to-reach-nearly-35-billion-annually-by-2020

What Utilities Don't Tell You

Each Smart Meter contains two (2) Transmitters:

- 1) LAN – range 3 Km
- 2) ZigBee – range 250'

Meshed-grid communities will comprise:
From 500 to 5,000 homes

Each home having 15-or-so “Smart” appliances
Each appliance has its own 2.4 GHz Transmitter

Collector Meter has 3-8 Transmitters:

- 1) LAN
- 2) ZigBee
- 3) WWAN – 850/1900 MHz

How a “Meshed-grid” Works

Community of 500 homes has 500 Smart Meters = 1,000 transmitters (i.e., 500 LAN and 500 “ZigBee”) !

15 ‘smart’ appliances per home= 7,500 transceivers – all operating on microwave oven frequency: 2.4 GHz!

All homes will endure many, up to hundreds of relays on every transmission - in BOTH directions!

All 8,500+ Tx/Rx in community emit pulsed M/W radiation – 8,001 on same M/W oven freq. of 2.4 GHz!

Reflected radiation & ‘Hot Spots’

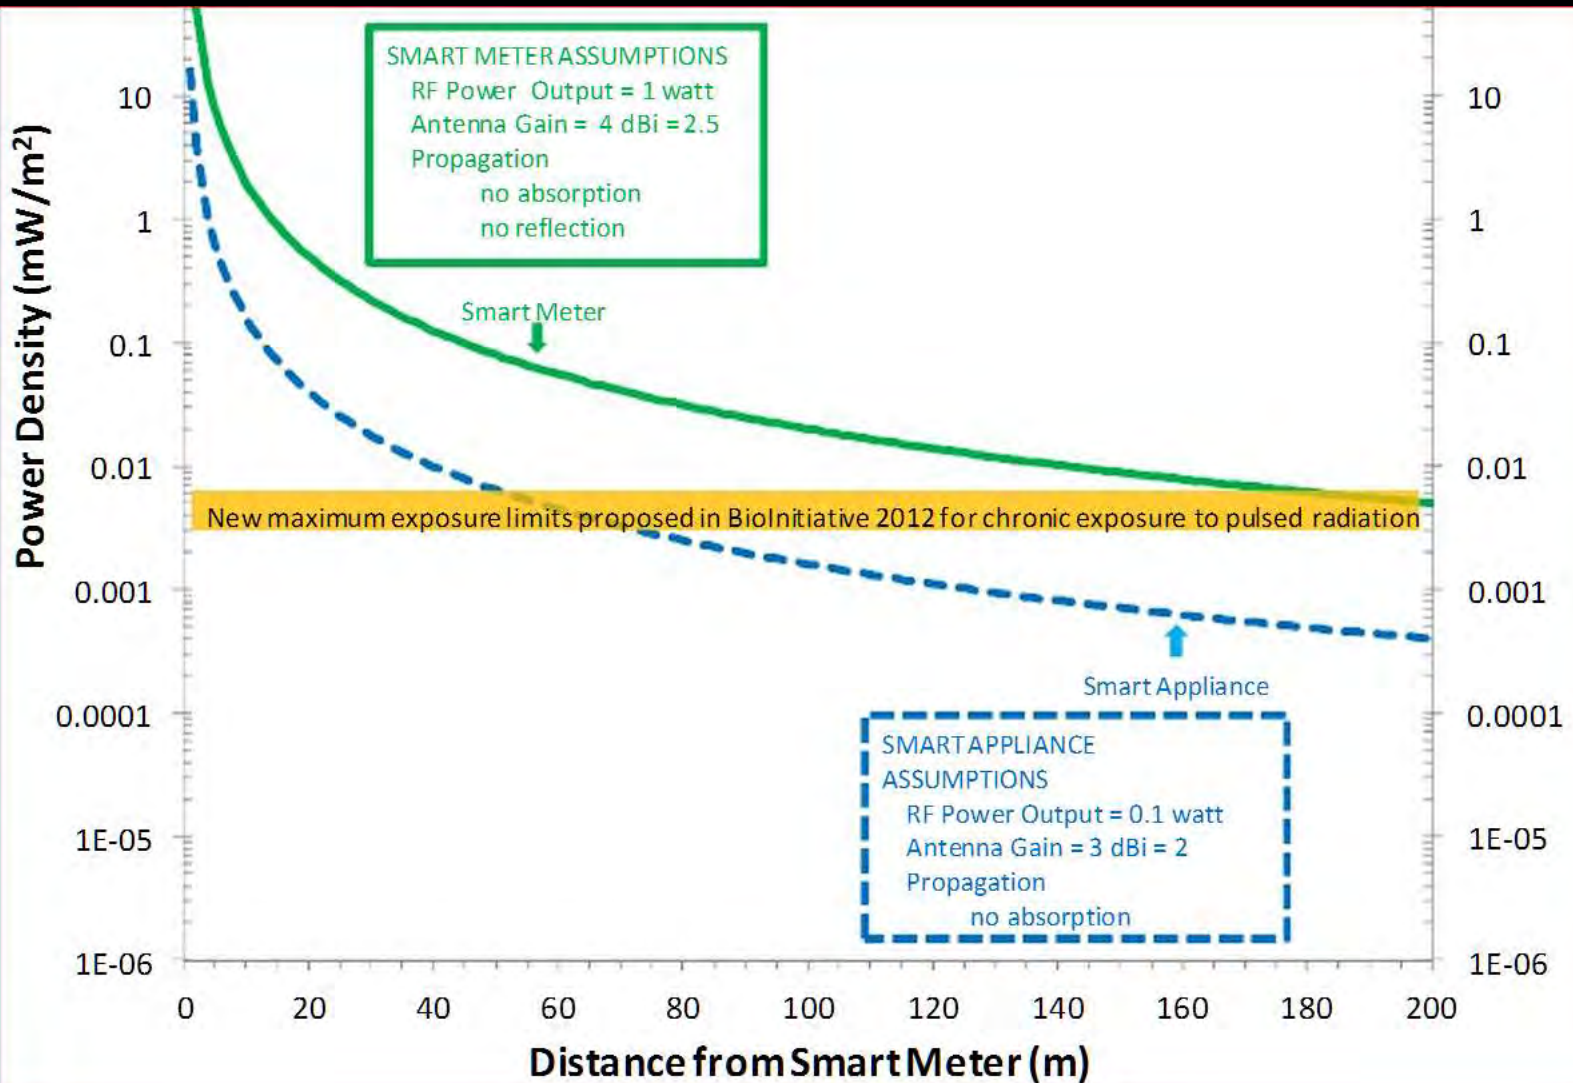

All of the above incalculable amount of EMR is on top of the ambient level of EMR already in your community!

One Smart Meter

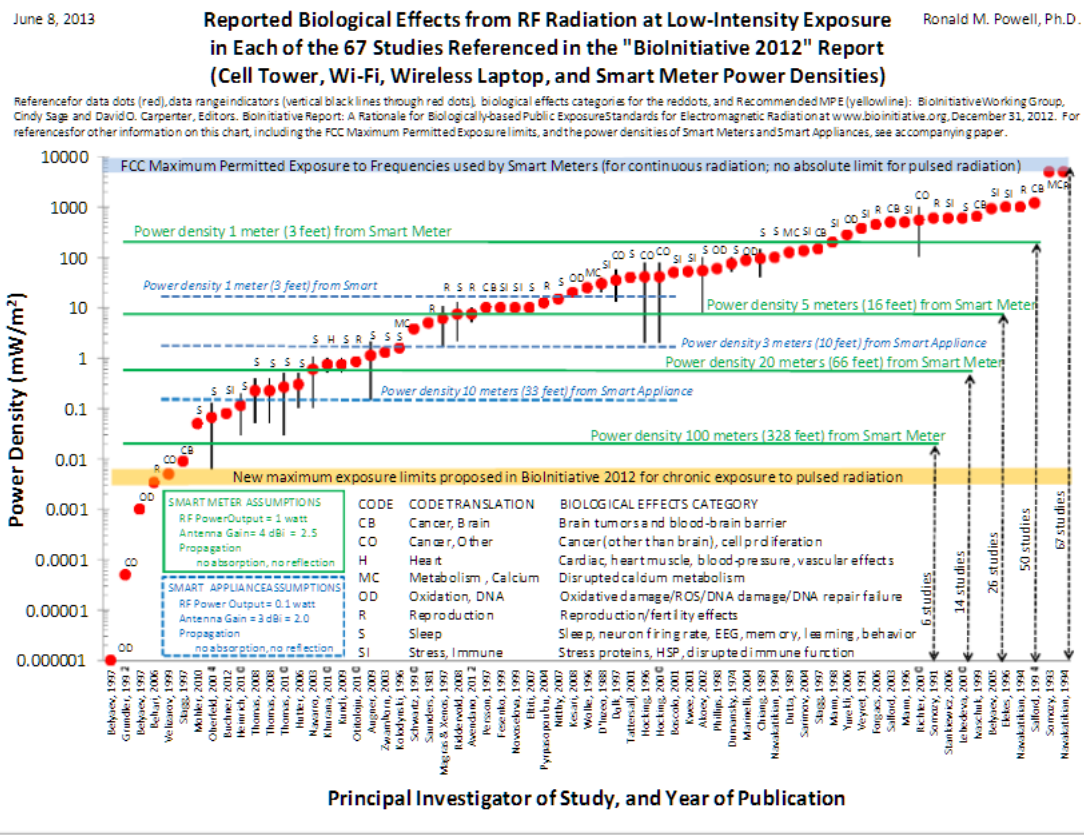

Can produce RF exposure levels that caused the biological effects found in either most or many of the 67 studies, depending on the distance from the Smart Meter

“Smart” Appliances

‘Smart’ appliances emit pulsed microwave signals at a power density of 100 mW and utilities envisage **15 appliances** in a typical home. None of this 2.4 GHz *radiation* exists in your home now!

<http://www.eeherald.com/section/news/nws201206102.html>

“Smart” Appliances

A single Smart Appliance in the home can produce RF exposure levels that caused the biological effects found in nearly half or fewer of the 67 studies, depending on the distance from the Smart Appliance. Multiple Smart Appliances in a home multiply the total exposure.

(BioInitiative Report 2012, explained by Ronald M. Powell, Ph.D.
App. Physics, Harvard U., 1975)

A Neighbor's Smart Meter

A Smart Meter on a nearest neighbor's home can produce RF levels that caused the biological effects found in many of the 67 studies. A given home may have 1 to 8 nearest neighbors, each with a Smart Meter, multiplying the total exposure in the given home.

**(BioInitiative Report 2012, explained by Ronald M. Powell, Ph.D.
App. Physics, Harvard U., 1975)**

Radiation in Your Home

Smart Meters and Smart Appliances operate in the same frequency ranges as cell phones. Further, Smart Meters have twice the RF power output of the typical cell phone, as shown in the table below, and will be transmitting day and night. Emerging Smart Appliances will likely have about one-fifth the RF power output of the typical cell phone. But a given home may have several Smart Appliances; and they, too, will be transmitting day and night.

Device	RF Power Output				
Smart Meter ⁴²	1.115	watts	which is	1115	milliwatts
Typical leakage from a microwave oven ⁴³	1	watt	which is	1000	milliwatts
Typical cell phone ⁴³	0.5	watt	which is	500	milliwatts
Wireless LAN (802.11a) ⁴³	0.251	watt	which is	251	milliwatts
Wireless LAN (802.11n) ⁴³	0.250	watt	which is	250	milliwatts
Cordless phone ⁴⁴	0.230	watt	which is	230	milliwatts
Smart Appliance ⁴⁵	0.100	watt	which is	100	milliwatts
Wireless LAN (802.11 b, g) ⁴³	0.100	watt	which is	100	milliwatts
Typical laptop wireless LAN (Wi-Fi) ⁴³	0.032	watt	which is	32	milliwatts

A Final Note

The Smart Meter is the first source of RF exposure that is mandated for installation in every home in an entire region without the informed consent, or any consent, of the residents, and that is not under the control of the residents.

(BioInitiative Report 2012, explained by Ronald M. Powell, Ph.D. App. Physics, Harvard U., 1975)

FORTIS BC Says:

Smart Meters will help keep rates lower ... save customers >\$19 million (less electricity theft) and lower meter reading costs.

FACTS:

CBC Survey of Toronto – >80% higher bills!

- Many report monthly bills doubling, tripling & even **quadrupling!**
- Analogue meters cost **\$50** & last 30-50 yrs
- Smart Meters cost **<\$500** & last <8 to 12 yrs
- **Smart Meters have caused countless fires**

Home Invasion – Security

CRIMINALS no longer need to stake out a home or a business to monitor the inhabitants' comings and goings. Now they can simply pick up wireless signals broadcast by the building's utility meters.

2012 – AAEM (60,000 pediatricians) oppose Smart Meters

The American Academy of Environmental Medicine opposes wireless “smart meters” in homes and schools. Chronic exposure to EMR is a preventable environmental hazard that is sufficiently well documented to warrant immediate preventative public health action.

2012 - Smart Meters Unethical Experiment

Dr. Eilhu Richter, M.D., an associate professor at Hebrew University-Hadassah, has said, *“Were these population-wide exposures to smart meters to be a part of a project carried out in a medical setting, to test the risks and benefits of a new technology on human health and well-being, it would be rejected ... as an unethical exercise in human experimentation.”*

Opposition to Smart Meters

British Columbia – 60 municipalities plus the Union of BC Municipalities (UBCM) want a moratorium.

BC's Utilities Commission (BCUC) approved Fortis BC smart Meters - with what is feared will be extortionistic Opt Out fees (07/23/2013)

Osoyoos Indian Band refuses to allow them on their land (Press Release June 2013)

Quebec – allows Opt Out (at a cost)

Opposition to Smart Meters in USA

The following states have either banned smart meters, have pending legislation against them, or have offered customers the opportunity to opt out. Some for health concerns, others over privacy issues: **California, Connecticut, Florida, Georgia, Hawaii, Louisiana, Maine, Maryland, Michigan, Nevada, Oregon, Pennsylvania, Texas and Vermont.**

2013 - NO “Wireless” Smart Meters in China

China's larger state-run utility has begun testing smart-grid technology using **fiber optic cable** that can be run inside electric power cables without interference that could eventually be deployed nationwide to deliver electricity, high-speed Internet, TV, and telephony to the farthest reaches of the country.

Telvent (Spain), maker of industrial **control systems for smart grid networks** admitted last week hackers had breached its network and accessed project files related to a control system used in portions of the electrical grid. Owned by Schneider Electric (France), Telvent told customers **attackers installed malicious software on its network and accessed project files for its OASyS SCADA system**, according to KrebsOnSecurity, which first reported the breach.

The anti-radiation missile is a smokeless, rocket-propelled missile that destroys radar-equipped defense systems

The AGM-88 HARM (High-speed anti-radiation missile) is used throughout the Air Force for suppressing surface-to-air radar warning systems.

Anti-radiation missiles help neutralize hostile airspaces and take out the enemy's ability to defend itself in advance.

The Air Force said, "Coalition forces in Operation Desert Storm operated 'at will' over Iraq and Kuwait after gaining control of the EM spectrum early in the war."

Boeing has test-flown a nonlethal missile that fries electronics while minimizing collateral damage (like civilian deaths). You can read about CHAMP [here](#).

Controlling the electromagnetic (EM) spectrum is a major asset in military operations.

The Marines recently demonstrated their painful “heat ray,” a weapon that blasts intruders with a wave beam that targets skin and makes victims feel like they’ve stepped in front of a blazing oven, but without killing them.

[See the gear >](#)

It doesn't cause irreversible damage, but will make someone instinctively back off.

Modern weapons systems employ radio, radar, infrared, optical, ultraviolet, electro-optical, and laser technologies.

Electronic Warfare – USA

“Heat Ray”

The Marine Corps “Heat Ray” raises the temperature of skin by 130 degrees

But it won't kill you. The Active Denial System (ADS) creates an intense heated sensation lasting 1-2 seconds and is caused by a radio frequency wave, not radiation or microwave.

Sgt. Maj. of the USMC Micheal P. Barrett ran for it after feeling the ADS.
Marines/Daniel Wetzel

"You're not going to see it, you're not going to hear

it, you're not going to smell it. You're going to feel it," said director of the Joint Non-Lethal Weapons Directorate, Marine Col. Tracy Tafolla.

The 95 GHz millimeter wave has a range of up to 1000 meters, or 7 football fields. The directed-energy beam only penetrates 1/64th of an inch into the skin.

As a nonlethal weapon, it can be used for crowd control or determining hostile intent before engaging with lethal weapons. ADS can buy life-saving time.

NORTH KOREA's last round of tests, conducted in May 2009, appear to have included a "super-EMP" weapon, capable of emitting enough gamma rays to **disable the electric power grid across most of the lower 48 states.**

CHINA

Electronic Warfare & Cyber Warfare

The PLA (Peoples' Liberation Army) has developed a doctrine of *"Integrated Network Electronic Warfare,"* similar to the Soviet concept of Radio Electronic Combat, with the goal of degrading the enemy through ***EW, cyber, and space warfare*** before a shot is fired.

The Chinese hacking threat is so common that the security industry has a new euphemism for the country, an "Advanced Persistent Threat."

CONCLUSION

Scientific evidence leaves no doubt that EMR poses the biggest single threat to humans and all other life forms in Canada's entire history and, in the case of Smart Meters, to our personal privacy and safety, and to our country's National Security! Governments must be made to divorce themselves from industry and instead protect the public. But this will not happen unless **YOU** STAND UP and SPEAK
OUT!
