

Are you prepared to reopen your business?

Personal Protective Equipment (PPE) Tips

Follow these tips to keep your staff and customers safe when reopening:

- Implement a PPE training Program
- Establish proper cleaning and disinfecting protocols.
- Provide clear communication to employees about PPE use, removal, and availability.
- Use signage to ensure PPE use.
- Conduct wellness checks and temperature checks on entry.

<p>How to Put On (Don) PPE</p> <ul style="list-style-type: none"> Identify the proper PPE to don. Perform hand hygiene using hand sanitizer. Put on gown (if applicable) Put on face mask, both your mouth and nose should be protected. Put on face shield or goggles (if applicable) Perform hand hygiene before putting on gloves. <p>Gloves should be changed between every patient, customer, or when company policy dictates.</p>	<p>How to Take Off (Doff) PPE</p> <ul style="list-style-type: none"> Remove Gloves in a way that prevents contamination of the hands. Remove Gown (if applicable) Remove Face Shield or goggles (if applicable) Do not touch the front of the shield or goggles. Remove and discard the face mask or follow disinfection and reuse policies. Perform hand hygiene, washing for at least 20 seconds. <p>Discard or disinfect all PPE according to CDC Guidelines and company policies.</p>

Top Tips to Protect Your Employees' Health

Provided by:

Actively encourage sick employees to stay home. Develop policies that encourage sick employees to stay at home without fear of reprisals, and ensure employees are aware of these policies.

Plan to implement practices to minimize face-to-face contact between employees. Actively encourage flexible work arrangements such as working from home or staggered shifts.

Have conversations with employees about their concerns. Some employees may be at higher risk for severe illness, such as older adults and those with chronic medical conditions.

Consider the need for travel and explore alternatives. Check CDC's Travelers' Health for the latest guidance and recommendations. Consider using teleconferencing and video conferencing for meetings, when possible.

Develop flexible policies for scheduling and working from home and create leave policies to allow employees to stay home to care for sick family members or care for children if childcare closes.

Provide education and training materials in an easy to understand format and in the appropriate language and literacy level for all employees, like fact sheets and posters.

Promote etiquette for coughing and sneezing and handwashing. Provide tissues, no-touch trash cans, soap and water, and hand sanitizer with at least 60% alcohol.

Perform routine environmental cleaning. Routinely clean and disinfect all frequently touched surfaces, such as workstations, counter tops, handrails, and doorknobs. Discourage sharing of tools and equipment, if feasible.

Re-opening Checklist

Provided by:

These steps are recommended to protect employees and prepare your business for disruption:

- Identify a workplace coordinator who will be responsible for COVID-19 issues and their impact at the workplace.
- Examine policies for leave, telework, and employee compensation.
- Identify essential employees and business functions, and other critical inputs such as raw materials, suppliers, and logistics required to maintain business operations. Explore ways you can continue business operations if there are disruptions.
- Prepare business continuity plans for significant absenteeism, supply chain disruptions, or changes in the way you need to conduct business.
- Establish an emergency communications plan. Identify key contacts (with back-ups), chain of communications (including suppliers and customers), and processes for tracking and communicating about business and employee status.
- Share your response plans with employees and clearly communicate expectations. It is important to let employees know plans and expectations if COVID-19 occurs in communities where you have a workplace.
