

**SIGNIFICANT LIFE EVENTS OR ENVIRONMENTAL CHANGES
WELFARE ASSESSMENT**
(Updated; Nov 2023)

Examples of life events/change could include but are not limited to; construction projects, unusual weather events, noise intrusion, change in housing, or changes in animals exhibited with or nearby etc.

This form will help measure collective physical and mental states over a period of time.

Period of time will include more than 3 days or longer-- of an event or change.

Species Name: _____ Species ID#: _____

Evaluator: _____ Date: _____

Life Event or Environmental Change:

Anticipated Time Span of Event/Change: _____

1. Where will this life event/change take place in relation to the animal, group or system? Where will animal, group or system be relocated or what changes will take place that may be deleterious to the animals, group or system?

2. What behaviors will this animal, group or system POTENTIALLY exhibit during this event/change?

3. List out any ACTUAL stress or atypical behaviors that have been noted throughout the life event/environmental change:

ACTION STEPS TO MITIGATE/ELIMINATE STRESS OR ATYPICAL BEHAVIORS:

- 1.
- 2.
- 3.
- 4.
- 5.
- 6.
- 7.
- 8.
- 9.
- 10.

Conclusion of Life Event/Environmental Change Observations: (meaning animal, group or system has returned to normal processes).

Any adjustments that could be implemented in the event of a repeat of this Live Event/Environmental change?
