

Outreach Final Project Details:

The purpose of this section is for your field camp group to show how the camp connected with the community, how it introduced geophysics to young people, or what benefits the community received from this project's scientific results.

Your application included a plan to achieve the outreach objectives of your project, and now we would like to see, in a more tangible way, how your project reached those goals.

Your Field Camp is required to deliver one of the following products:

- 1.- Presentation.
- 2.- Media: video recording, sound recording.
- 3.- Print: flyer, abstract, article, etc.

Your final product must be:

- Presented at a local academy institution, local community gathering, local government entity, etc.; or
- Shared on social media; or
- Presented in a webinar session/discussion; or
- Presented on a local radio program; or
- Published in a local magazine, local newspaper, etc.

Product Content Required:

- a. Brief description of your project, what was the problem, what did you learn and how did you apply geophysical methods to solve it.
- b. Future possible next steps. Can your project findings lead to a future Field Camp?
- c. HSSE awareness.
- d. Community involvement and the benefits it obtained. How did you communicate with the community? Did your project promote the interest of the community in geophysics?
- e. Recognition to SEG and all your funding, supporting entities.
- f. Date and location of Outreach
