

AROGA®

GASTROINTESTINAL SUPPORT

WELLNESS BEGINS WITHIN®

The Gastrointestinal tract digests food into nutrients and absorbs them into the bloodstream. It also serves a major role in immune function, housing 70-80% of our body's immune system. The gut's microbial population plays major roles in digestion and absorption of nutrients, but, more than that, it has a major role in proper immune function for the whole body. In addition, gut bacteria are vital players in brain function and health. The so-called gut-brain-microbiota axis often called our "second brain," is in a very large part controlled by our gut microbiota.

The body is designed to stay healthy. When our body's cells become old or damaged, they must be repaired or, if repair is not possible, replaced by young, healthy cells. Apoptosis, and its associated pathways, is the process by which the cells that make up our bodies are either repaired or, if repair is not possible, are removed so that they can be replaced by new, healthy cells. These processes (repair, removal, rejuvenation) occur every minute of our lives and are necessary for optimal health.

Aroga's Pathways Plus Gastrointestinal Support provides foods not typically found in the modern Western diet, that support optimal functioning of the digestive system, and that are required for its repair, removal, and rejuvenation.

Gastrointestinal Support is now supplied in a 100-gram jar of bulk powder. Each scoop provides 3000 mg of power-packed GI support each day.

INGREDIENTS

Mesquite Bean Powder
Gum Arabic
Maca Root Powder
Blueberry Powder
Beet Root Powder
Xylitol

One Time \$136.25	RV: 125 CV: 125
