*Research Institute for Quality of Life*

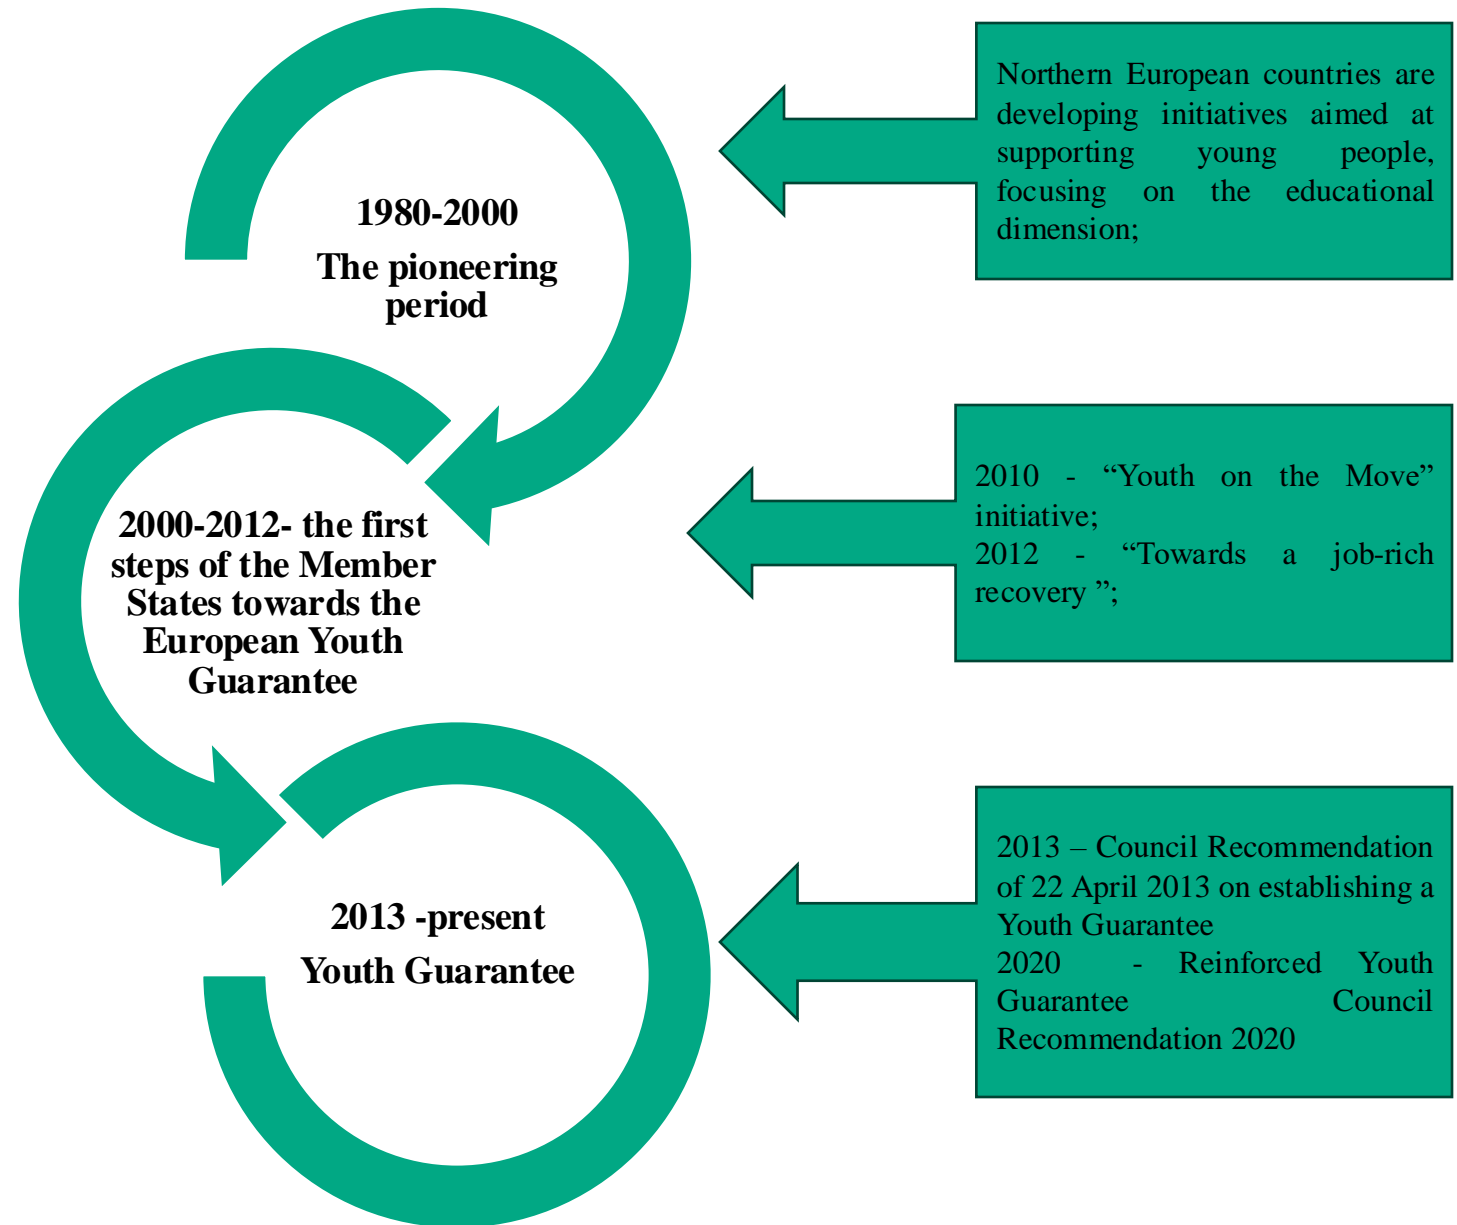

**10 September 2024 | Bucharest**

## A brief review of the YG and NEETs:

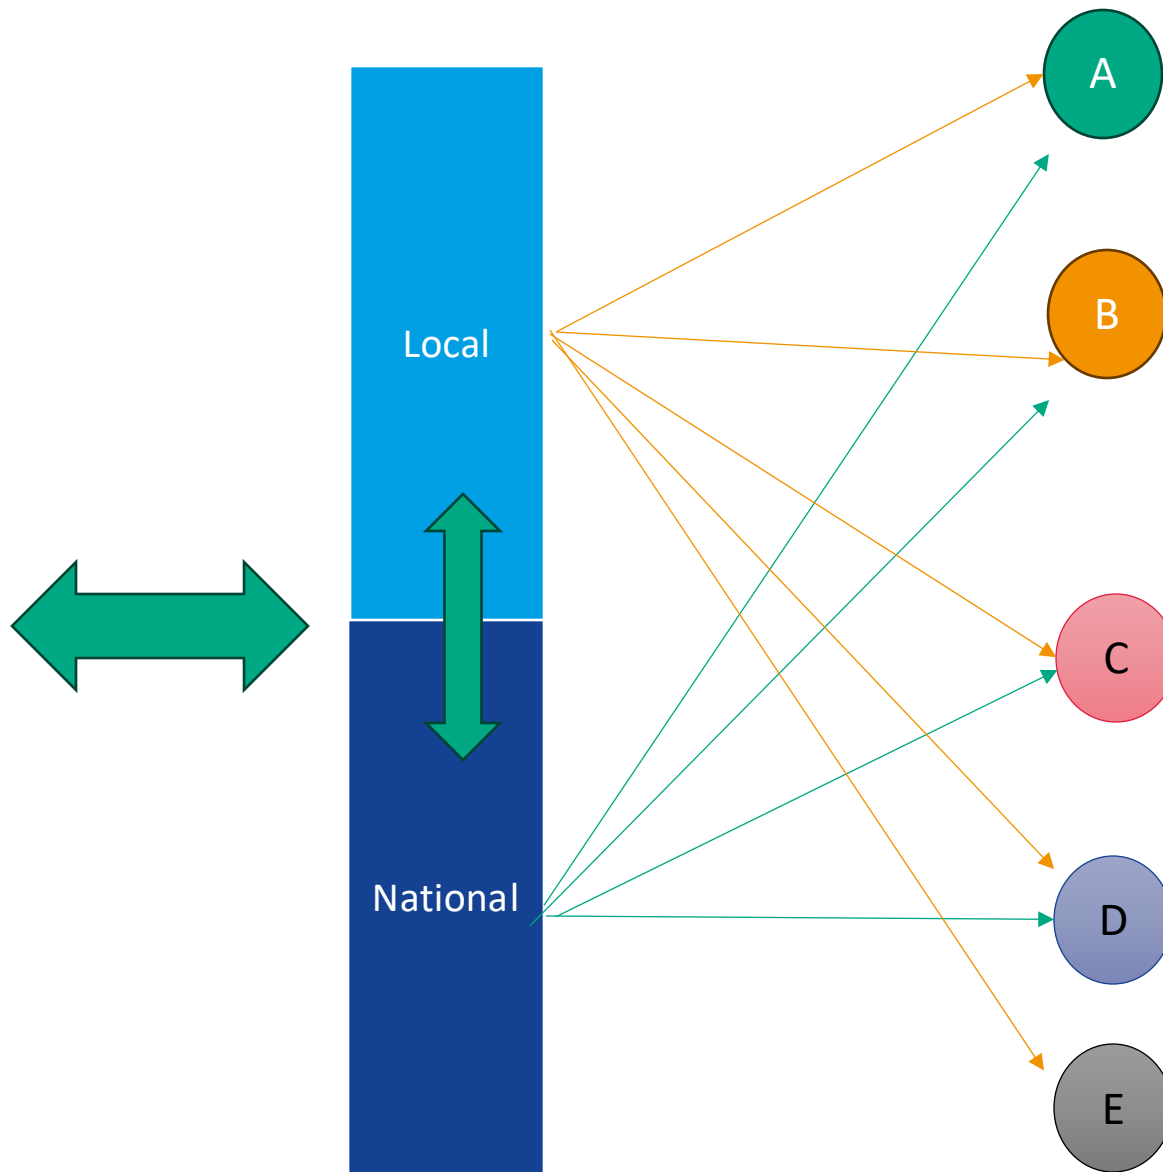

- Youth Guarantee (YG) - from the first initiatives for young people to the reinforced YG of today
- The first classifications of the NEET population and the need for their improvement
- What changes took place between 2013 - 2020 at the YG level

# - Youth Guarantee - the most important steps

1. The Youth Guarantee aimed to ensure that all young people **under the age of 25** receive a good quality offer to get a job, continue their education, enter an apprenticeship or do a traineeship, in an interval of four months from entering unemployment or from the moment when they are no longer enrolled in formal education (Council Recommendation of 22 April 2013 on establishing a Youth Guarantee).
2. The reinforced Youth Guarantee is designed to ensure that all young people **under the age of 30** benefit from a quality offer of employment, further training, an apprenticeship or a traineeship within four months of becoming unemployed or having left formal education, under *Principle 4 of the European Pillar of Social Rights*. (Bridge to Jobs - Reinforcing the Youth Guarantee and replacing the Council Recommendation of 22 April 2013 on establishing a Youth Guarantee).

**YG 2013 –  
present  
activities and  
institutions  
involved**  
*(example of  
Romania)*

Job finding - local authorities, local and national employers

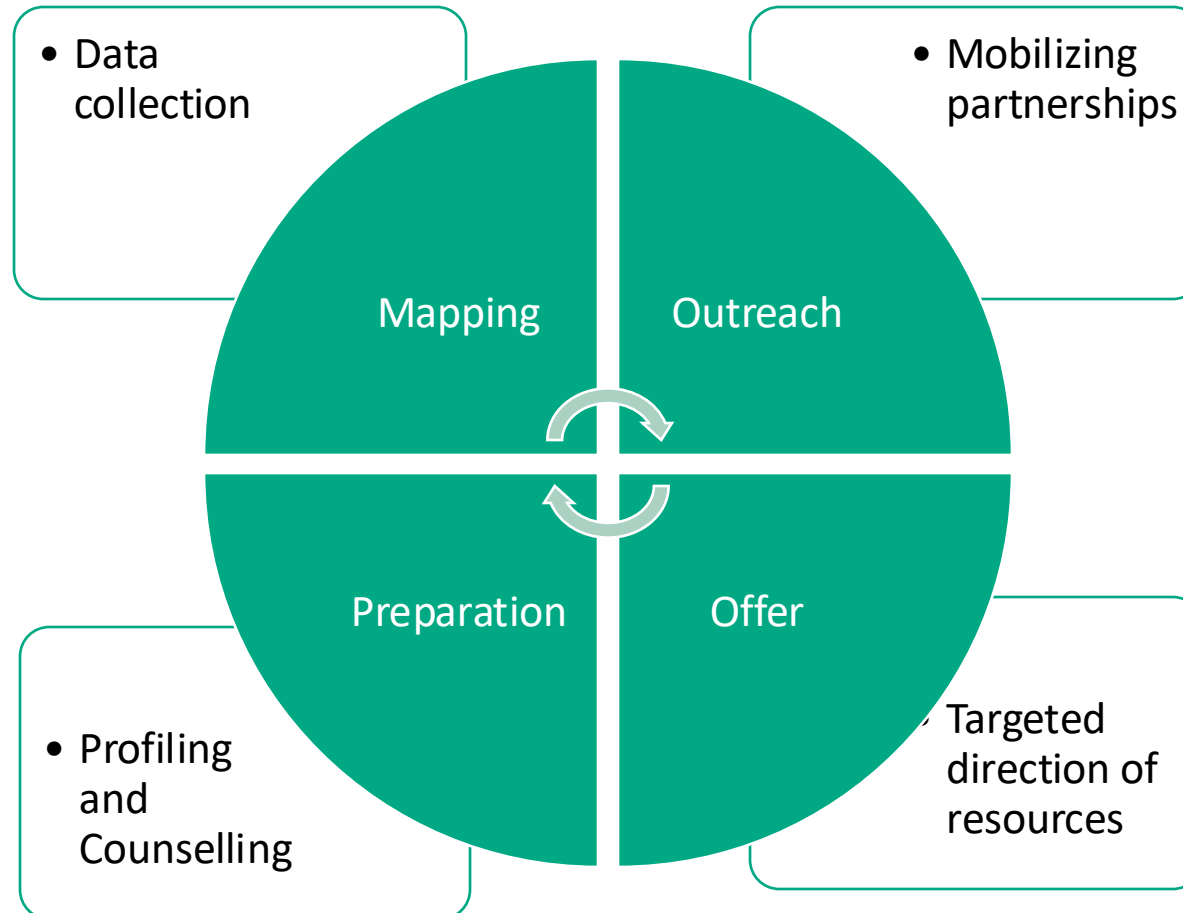

Vocational training - local or national vocational training providers

A second chance program - the Ministry of Education

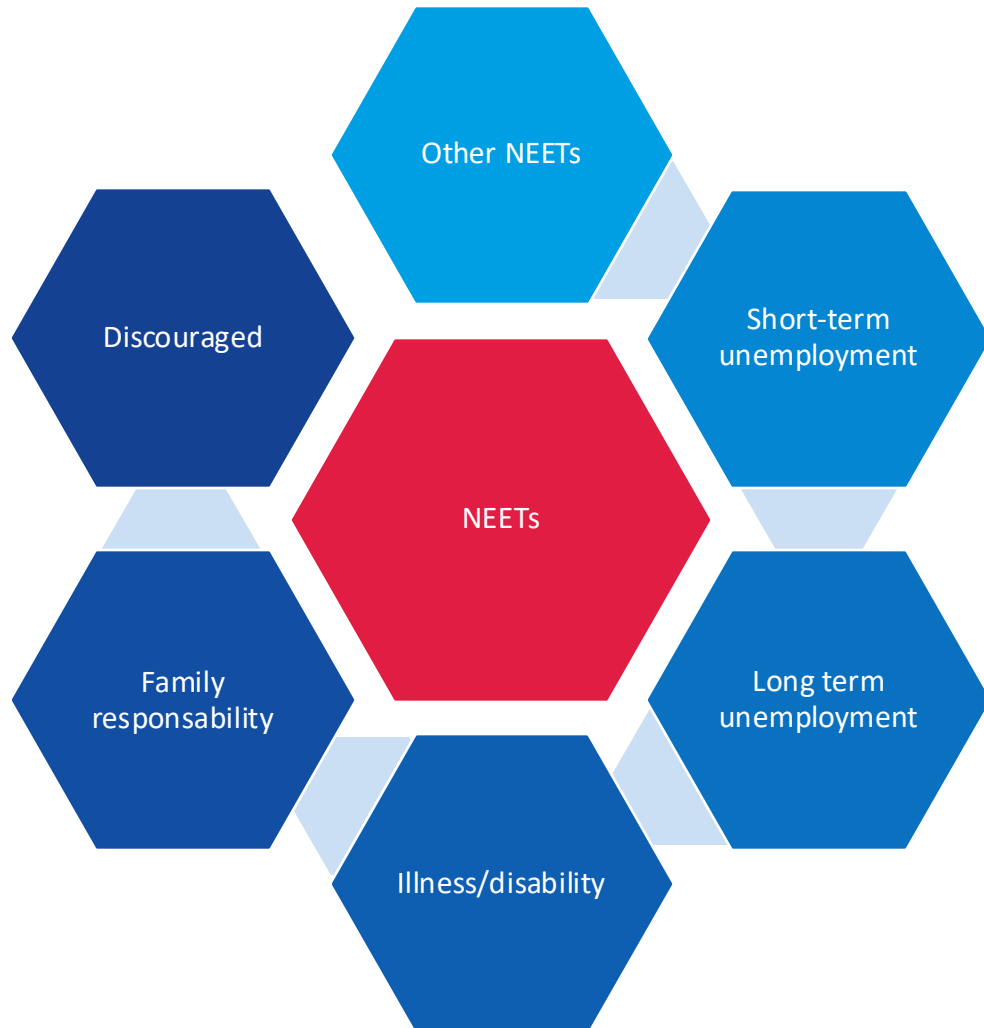

Unemployment benefit - local PES

Subsidising jobs - local PES for employers

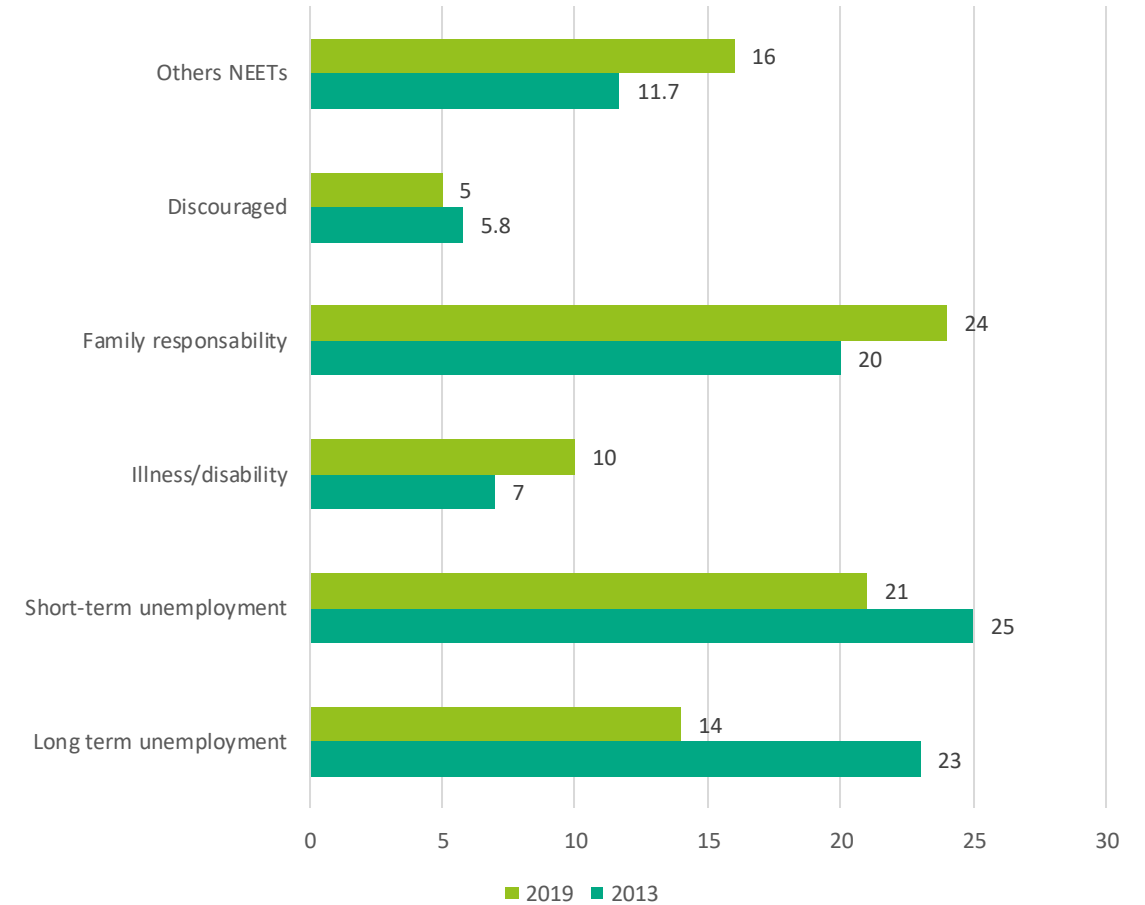

# Reinforced Youth Guarantee- a new perspective

# Composition of NEETs (%) in the EU

Mascherini et al., 2012; Mascherini, M.& Ledermaier, S., 2016

EU Labour Force Survey 2013 and Eurofound 2021

## Old criteria. Old data.

### Eurofound - The first classification of NEETs

1. *socio-demographic* (age, gender);
2. *level of education* (at most secondary level);
3. *PES records* (register).

**The heterogeneity** of NEETs is not fully described by age, gender or education level and conceptual typologies.

Successive international reports (eg, LFS, 2016, 2018, 2020) have indicated that *socio-familial background, educational aspirations, welfare* and social protection system characteristics better describe the typologies and trajectories of NEETs.

**Important:** If a person is not considered vulnerable then there is a risk that they will not be included in support programmes

# How well do we know the NEETS?

Elaboration based on EU Labour Force Survey, 2019 – 2020 (Data about Romania)

## Job search strategies used by young people (%)

Elaboration based on EU Labour Force Survey, 2019 – 2020 (Data at EU level)

# Finding a job through PES in 2020

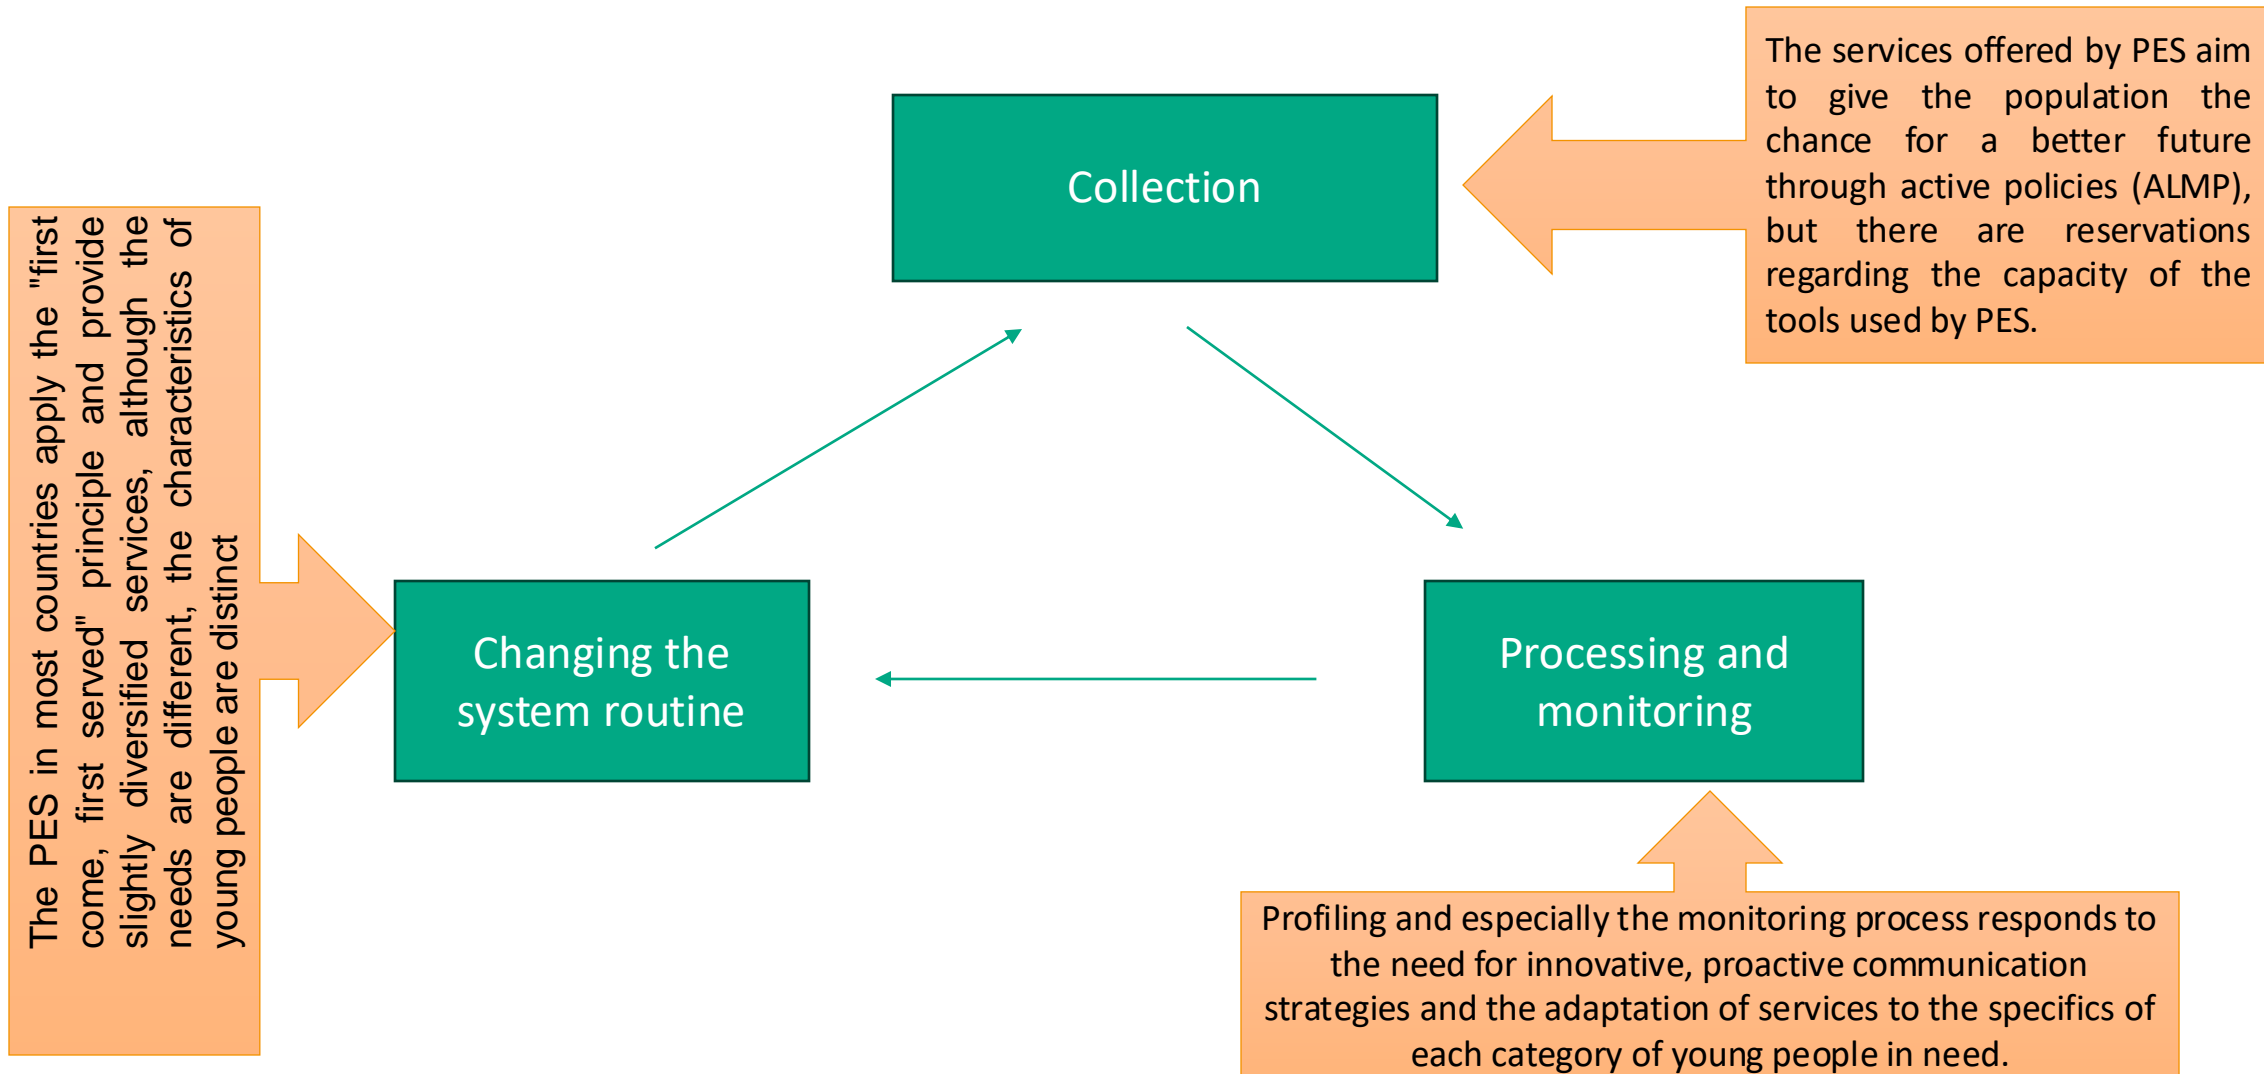

*Elaboration based on EU Labour Force Survey, 2019 – 2020 (Date at EU level)*

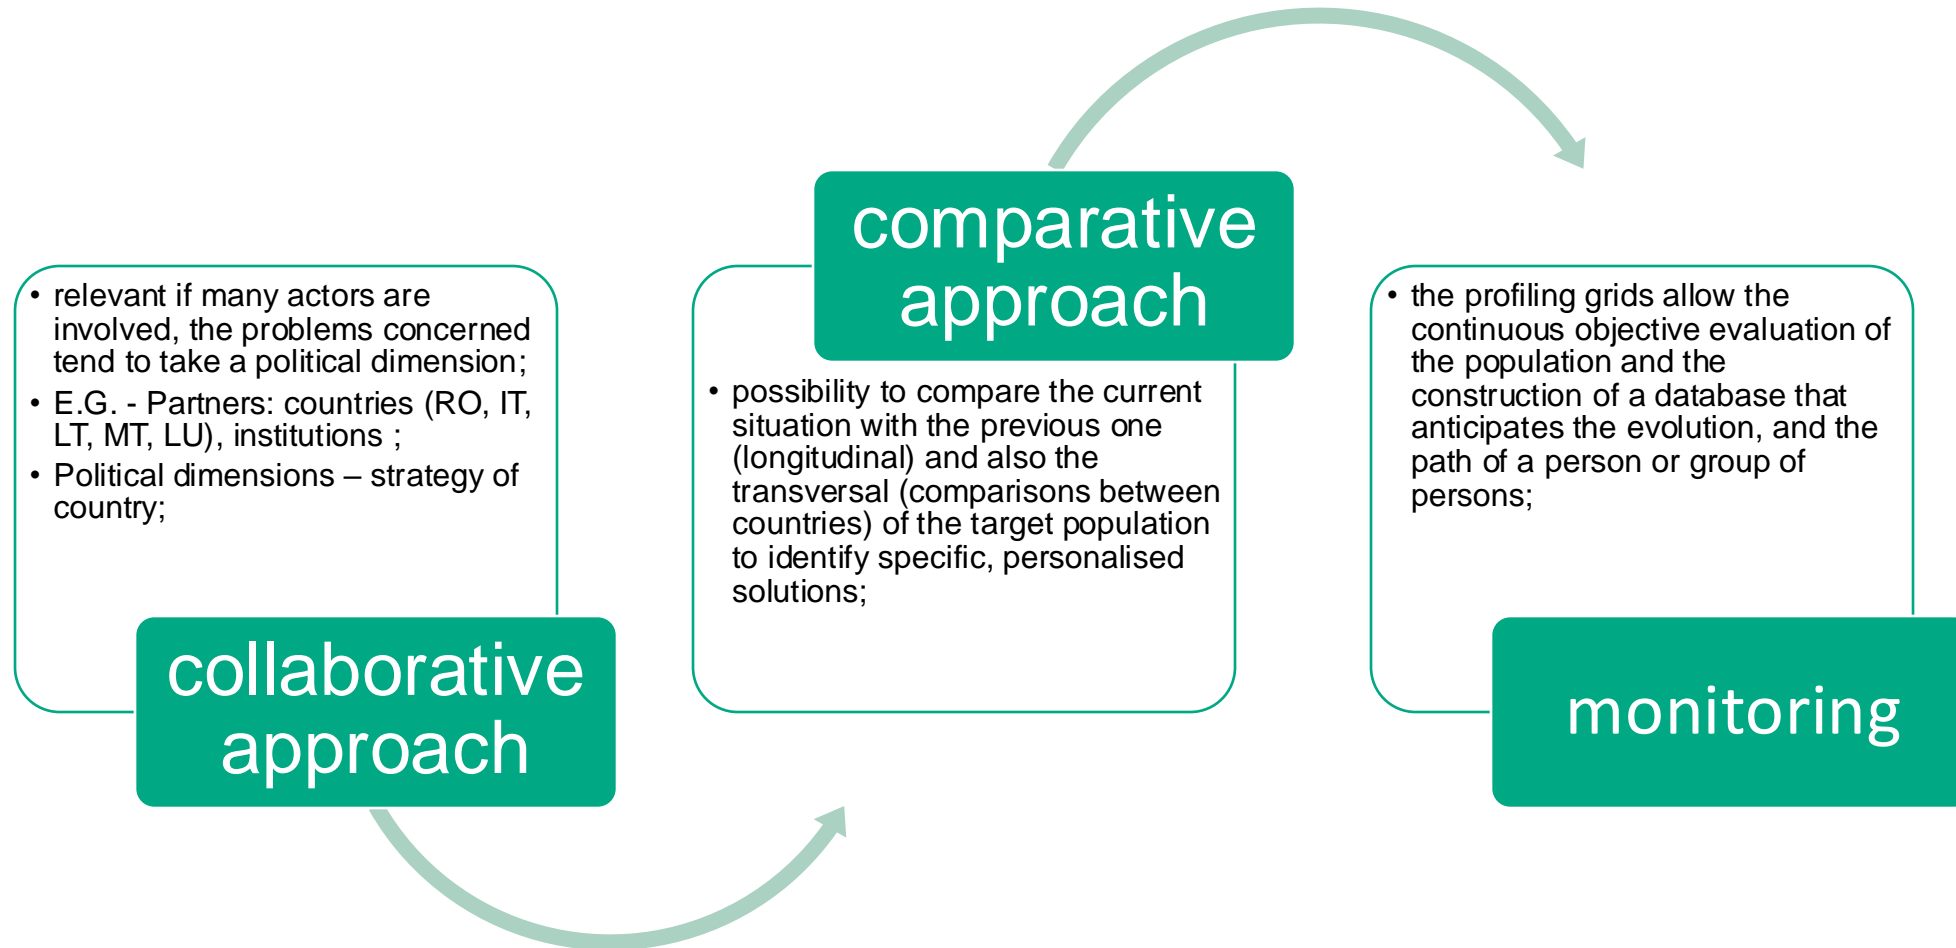

# Profiling - beginnings and adaptation to the needs of the current society

1. Profiling - priority objective
2. Profiling - stages and expectations
3. Relevance of the profiling process
4. Best practice - atWork4NEETs
5. The utility and applicability of profiling NEETs
6. Conclusion

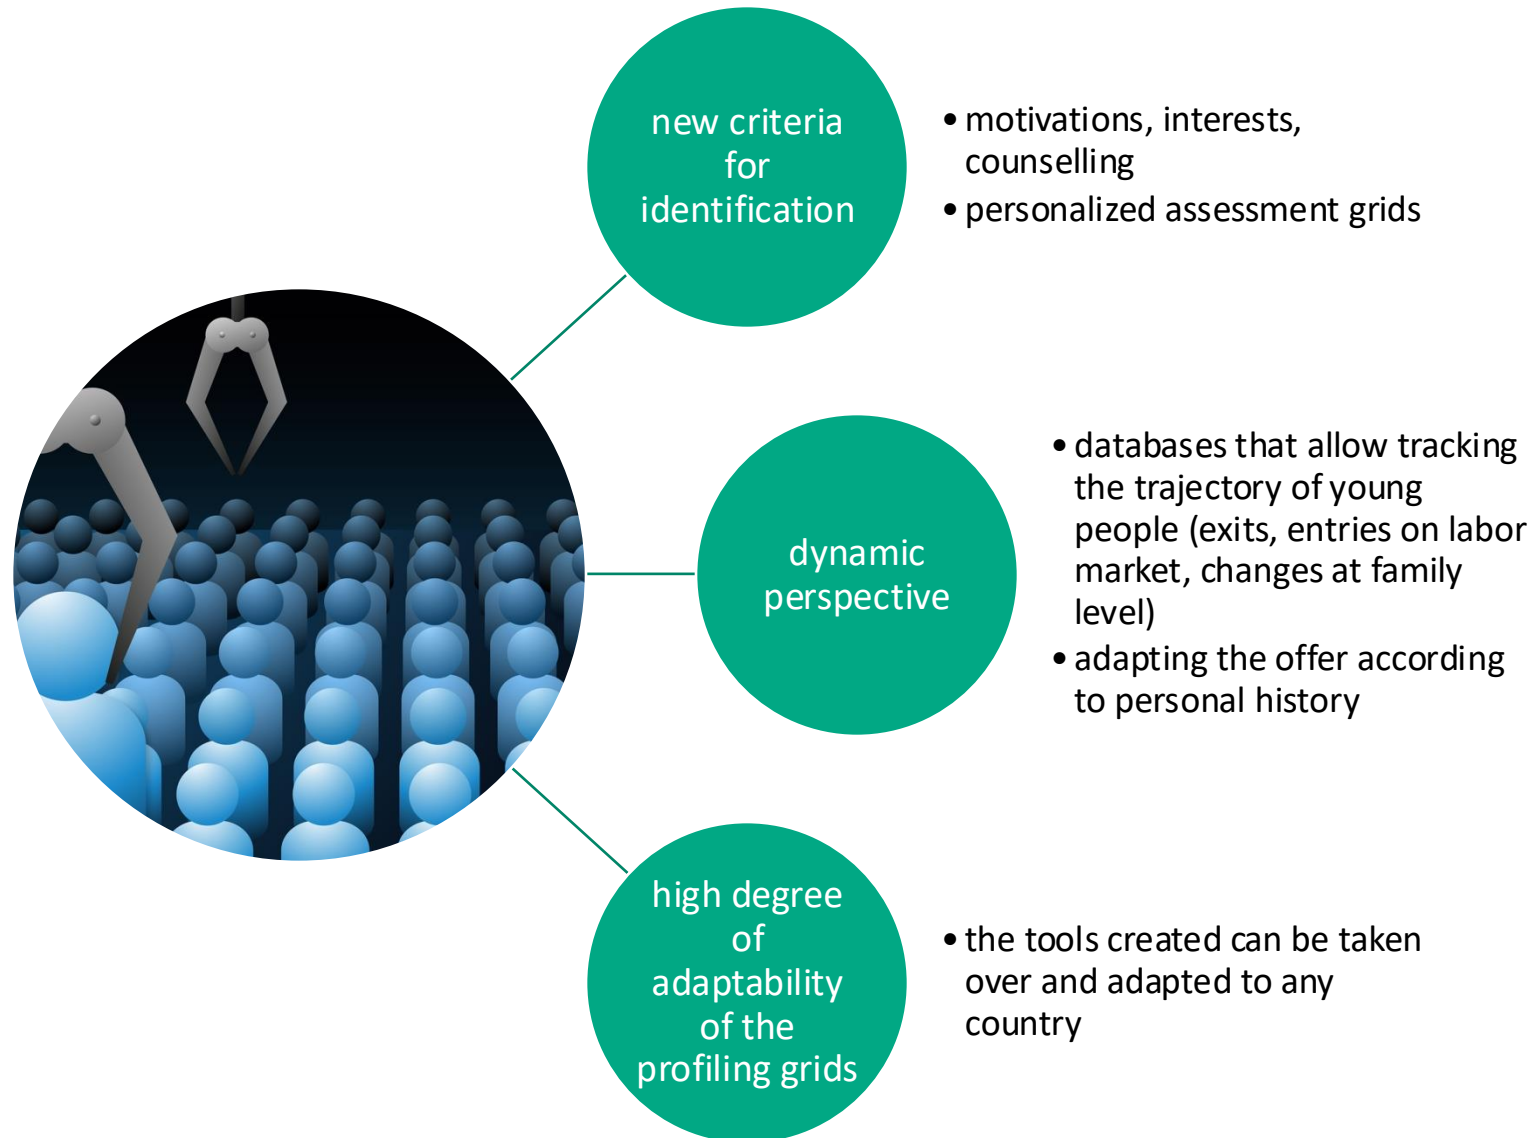

# Profiling stage and expectations

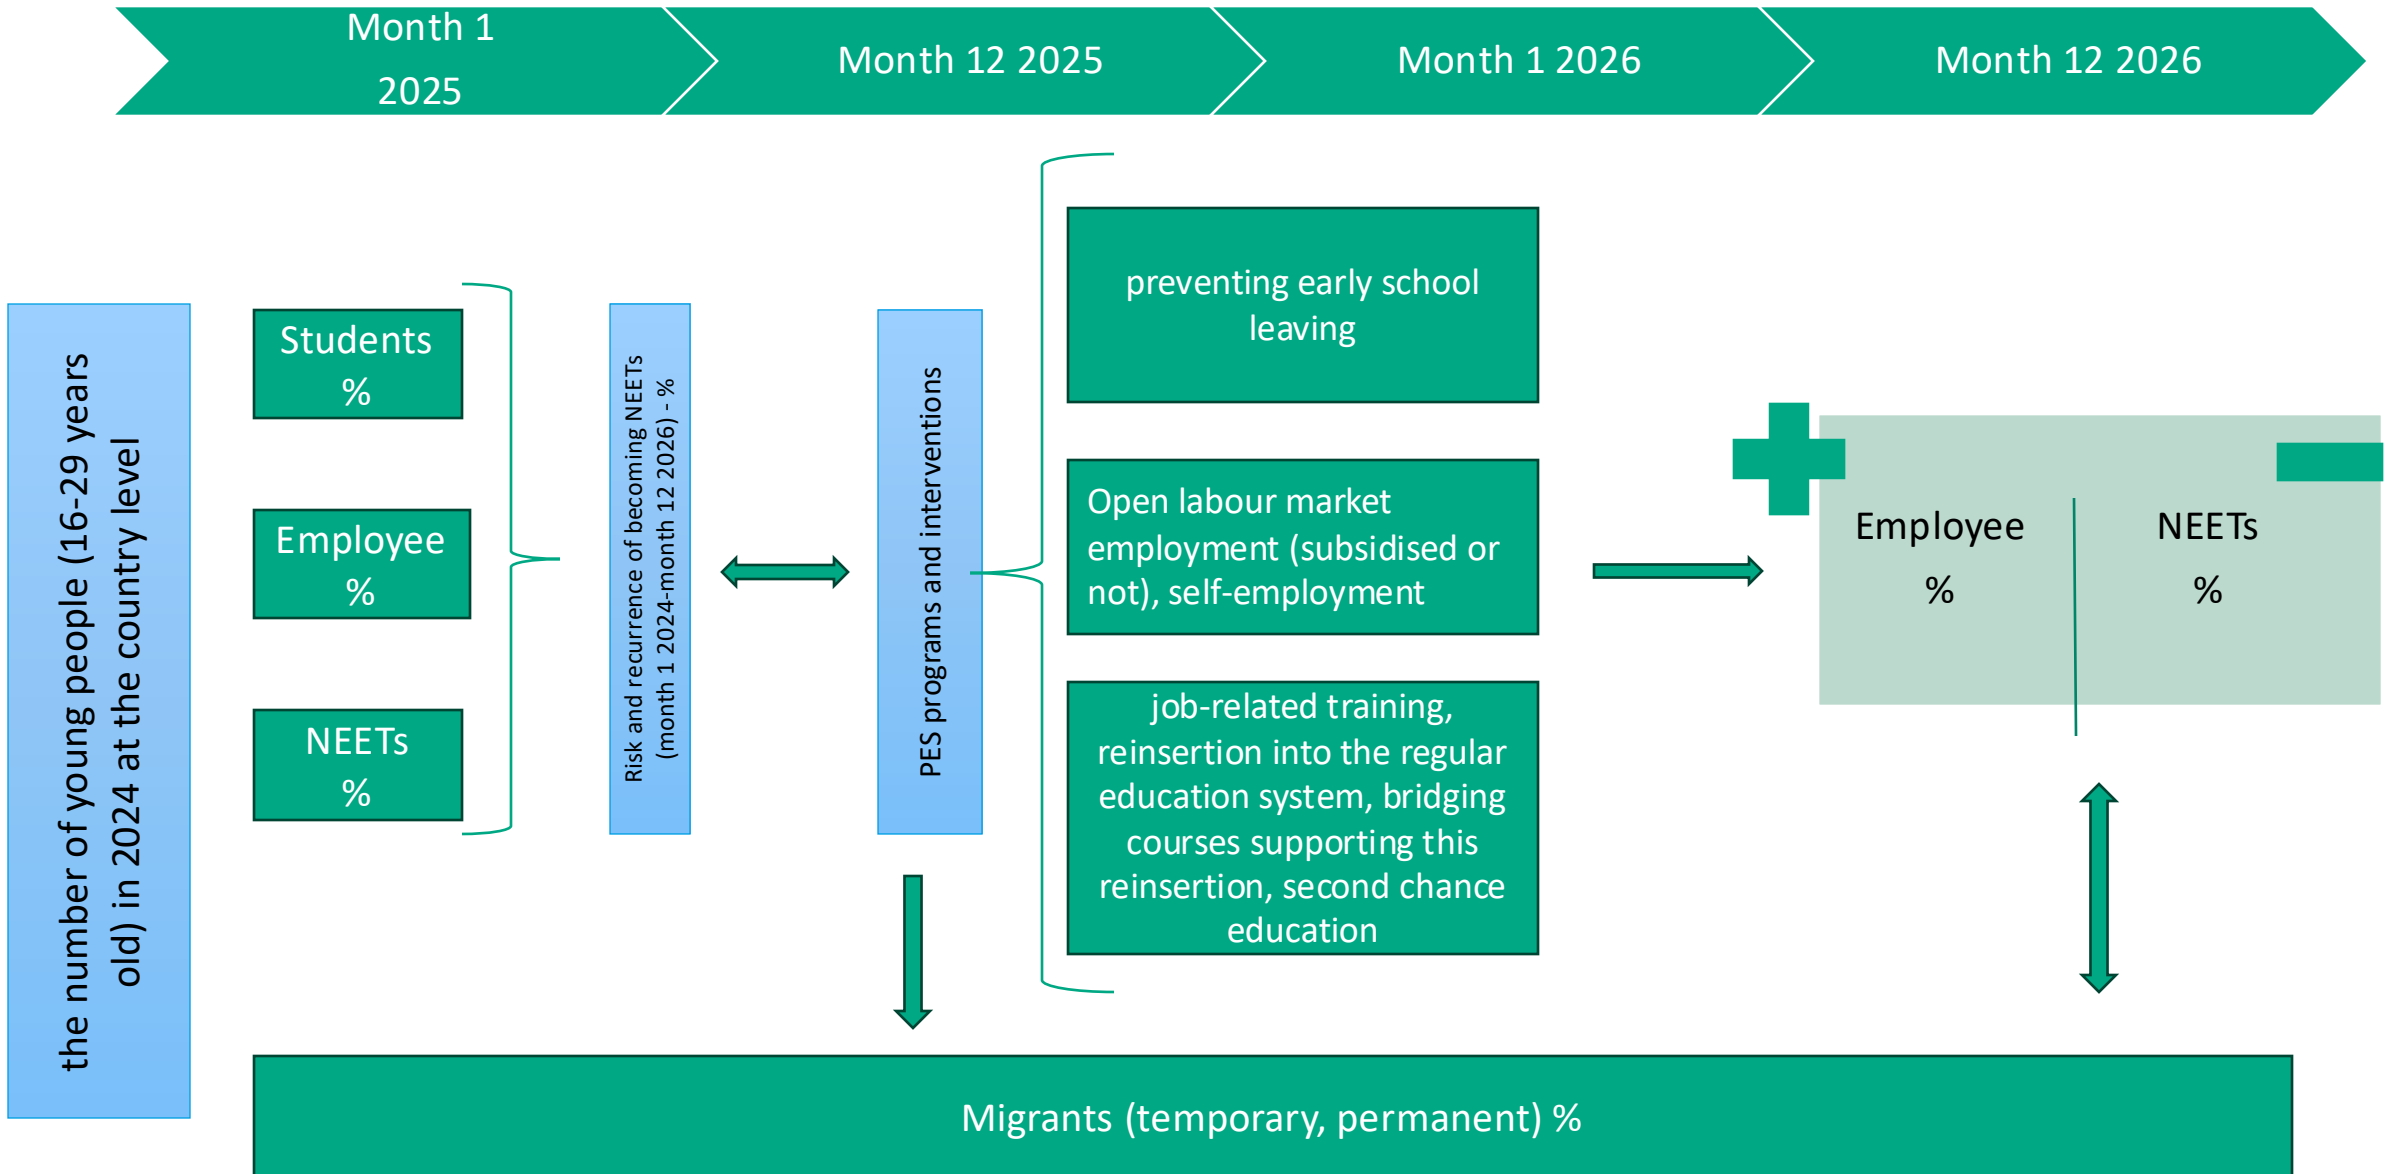

# Profiling - relevance

# Best practice - atWork4NEETs - development of profiling of NEETs

# The utility and applicability of profiling NEETs

# Conclusion

- YG- has adapted to the new labour market conditions and the needs of the population;
- The need for new tools to support the implementation of support for young people in need is demonstrated;
- There is a need to expand the list of criteria according to which support for young people is evaluated;
- Profiling - applicable both at the level of any country (transverse) and over long periods (longitudinal);
- The activities carried out in **atWork4NEETs** project have a high level of applicability and transferability.
