**Unique Culture** 

Racially, culturally, and ethnically Japanese are one of the most homogenous people groups in the world. They identify themselves in terms of biological heritage, birth in Japan, a shared culture, and a common language.

The uniqueness of

Japanese culture can be 🌈 seen in their art

forms, which include: ikebana-highly refined flower arrangements, chanoyu-choreographed tea ceremonies, calligraphy, Bunraku puppetry, Noh and Kabuki dramas.

#### **Pressure & Stigma**

Japan has had one of the world's highest suicide rates for many years. Along with intense work culture, there is also a stigma against seeking treatment for depression or other interventions that could help reduce suicide.

#### **Daily Living**

Japan's economy is based on a competitive market/private enterprise system. Many families farm as a secondary occupation. Typically, the wife tends to the farm while the husband works full-time in business/industry. Rice remains the principal crop, and its production is strictly controlled. Other sources of income include livestock, fishing, shipbuilding, foreign trade, scientific research and technology development.

Many men, women, and children enjoy wearing Western clothing for daily activities. Traditional costumes are worn during special religious ceremonies or festivals. Japanese women often wear their traditional silk Kimonos.

Many Japanese are indifferent to and skeptical of established religion. Careers, possessions and materialistic pleasures have become an obsession for many. Their greatest need is to be introduced to the Father through His son, Jesus.
