Attention Dry Storage Customers: We're now using a software product called Dockhound to track launch requests and boat movements at the marina. This means you can now text us when you want your boat launched instead of calling or showing up.

Here's how it works....

To request a boat launch, send a text to this number:

TEXT “water” TO (843) 407-3587

All you have to include in the text is where you want the boat. Your options are “**water**” or “**rack**”, so make sure one of those words is included in your text.

We'll let you know when your boat hits the water.

Save this number as a contact in your phone so it's there for next time you want to launch your boat.
