Visual Identity Design Manual

Introduction

Intercept: the reason for a new brand.

There are many reasons why a project needs a corporate image.

First of all, the clear application of a trademark satisfies the need of accurately defining the identity of the project, and it represents a fundamental element of communication. Visual identity favors external relations, characterizing communication initiatives, and contributing to the functioning of the entire project.

Guidelines for the design of the Visual Identity

This *document* is meant to be used for every graphic creation process related to the Intercept project. It is a set of instructions and guidelines aimed at synchronizing design and marketing projects with **elegance** and **strength**, a useful work tool for all those involved in the project.

The first purpose is to orchestrate a strong appeal to the brand, to contribute to the dissemination of a visual strategy consistent with the positioning of the message, and capable of generating a modern and updated “sentiment” in every aspect of visual messaging.

**** Each visual element presented, logo, typefaces and color palette, are in line with the Communication and Design Manual EEA and Norway Grants.**

THE LOGO

The Intercept brand is configured as a logotype with the name of the project.

The logo is composed with the **Founders Grotesk semibold** font with a strong and decisive impact and a highly recognizable institutional intent.

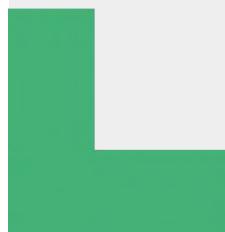

To enrich the visual identity we add graphic signs that represent a **target symbol**.

An ornament that adds dynamism, and helps to associate the logo with the fundamental elements of the project such as positivity, targeting and a sense of opportunity for the future.
