Connecting the new **generations** with **green** companies.

INTERCEPT is aimed at unleashing the potential of **NEETs** aged **25-29** in the **green sector**. The project is carrying out **research on NEETS and green companies**, identifying needs and opportunities in this area: it will select 300 NEETs in **Italy, Malta** and **Lithuania**, train and enrol them in **green businesses**.

We believe that supporting **NEETs** is an investment with high potential return and a promising tool for social inclusion.
