If you are a **young person** interested in creating a career with a positive impact on the environment, **INTERCEPT** offers you the possibility to participate to a training period and an **internship** to test your aspirations. In particular, our proposal is aimed at young NEETs (Not in Education, Employment or Training) aged **25-29**.

The **three-month paid work** period with local companies active in the green economy sector will be an incentive to increase your skills and create a future for your work.

INTERCEPT project benefits from a € 2.18M grant from Iceland, Liechtenstein and Norway through the EEA and Norway Grants Fund for Youth Employment
