

## **ASLA Chapter or Regional Climate Action Committee Proposal**

### **Purpose:**

- Inspire action toward the adoption of climate positive design
- Coordinate with ASLA national and regional chairs on climate action
- Connection point for regional networking around climate issues
- Provide education and outreach about landscape architecture and the climate crisis

### **Organizational positioning:**

- Committee chair an officially recognized leadership position (even if non-voting) within the chapter
- Report to the chapter's leadership committee

### **Committee Responsibilities:**

- Coordinating
  - Participate in quarterly and/or annual informational meetings with other chapters
  - Join the ASLA Climate Action Chapter Chair Basecamp team to stay up to date on support and news from national-level [ASLA Climate Action Committee](#)
  - Coordinate efforts with other regional or chapter Climate Action Committees
  - Serve as liaison between academic programs and the chapter
  - Serve as a liaison between student chapters and the chapter
- Connecting
  - Work with national and regional partners to contribute to maintain a mailing list of climate action experts and volunteers
  - Contribute information about climate impacts, solutions, and projects in the region for the national climate database
  - Be a liaison between the chapter and other local professional organizations and community organizations active in climate action
  - Lead the conversation about climate action by following local issues and networking with local experts of any discipline
- Educating and Outreach
  - Lead organization and participation in state and [regional webinars](#) about landscape architecture and climate impacts
  - Use the ASLA [Climate Action Now](#) advocacy guide to engage volunteers in the advancement of climate positive design policies
  - Share updates and accomplishments with members as well as with the public through the Chapter website and its social media channels
