CUARTO CRECIENTE

LUNA LLENA

CUARTO MENGUANTE

LUNA MENGUANTE

GIBOSA CRECIENTE

GIBOSA MENGUANTE

Las diferentes formas de la Luna que vemos en diferentes momentos del mes se llaman fases de la Luna.

A diagram showing the Earth in the center, surrounded by ten different phases of the moon. The moon phases are arranged in a circle around the Earth. Each phase is accompanied by a rectangular box for labeling. The phases shown are: New Moon (top), Waxing Crescent (top-right), First Quarter (right), Waxing Gibbous (bottom-right), Full Moon (bottom), Waning Gibbous (bottom-left), Last Quarter (left), and Waning Crescent (top-left). The Earth is depicted with blue oceans and green continents. The background is a starry sky with a sun on the right side.
