Define scanning areas

Inventory scanning is our way of:

- making sure all of the books are in order
- identifying which books were lost/stolen
- identifying problematic records
- finding books that were misshelved long ago and lost in the sea of books

Some common errors that we find:

- Mismatch between call number in the system and on the spine label
- Materials that are still checked out
- Materials that were supposed to be pulled/discharged
- Materials that we couldn't find and are labeled as missing or lost
- Materials that were never cataloged when the library went digital
- Barcodes linked to the wrong record
