 will be enabled
 - Blue = Active tab and record type
- Record type can be selected below the Tabs
 - DC21
 - o MARC21
 - Holdings

Side-by-side editing of primary and searched/browsed records:

- Allows users to view the searched/browsed for record when searching external resources (Search & Browse>Search Resources) alongside the primary bibliographic record
- Allows the user to easily compare the primary bibliographic record with the searched record
- Provides the user with easy navigation back to the search form to refine your search as needed

To view side-by-side editing of primary and searched/browsed for records:

- 1. Open a bib record in the MD Editor
- 2. Click Search & Browse>Search Resources
- 3. Select the Search Cataloging Profiles
- 4. Edit/type in the search criteria
 - Note: it will pre-populate the search criteria with information from the primary search record
- 5. Click **Search**
- 6. Click View
 - Both records will open in the MD Editor to allow the user to compare the two records

- 7. Click **Back** to return to search results
- 8. Click **View** from another bib record sideby-side with the primary bib record

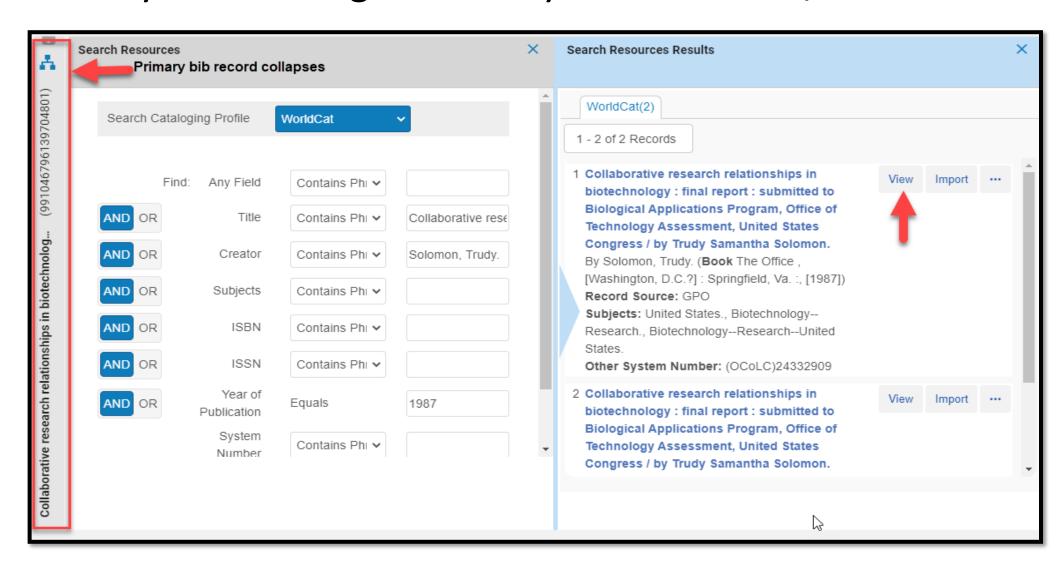

NOTE: Back also allows the user to edit the search criteria

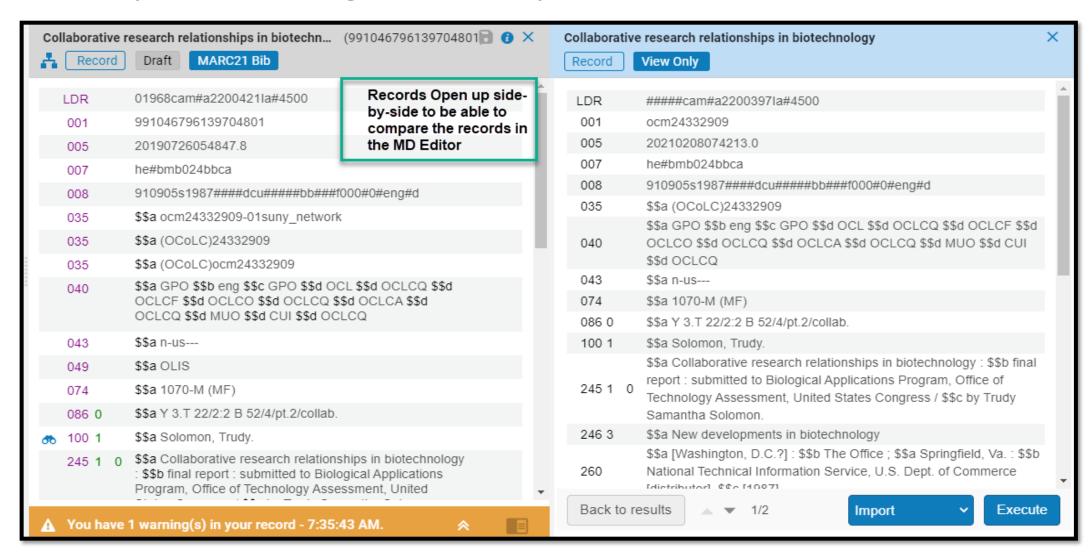

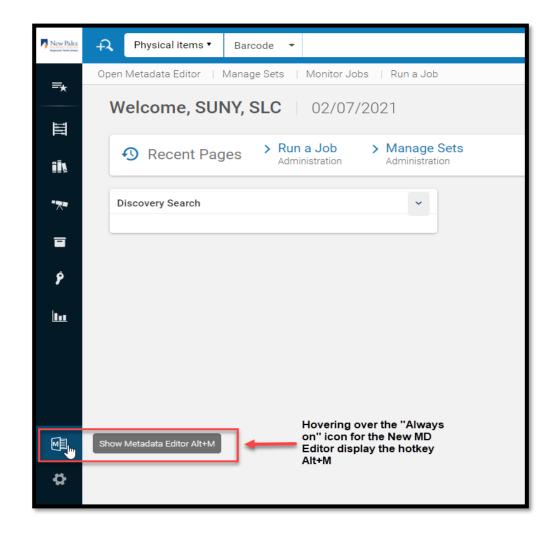

New MD Editor Hotkey

- **Alt+M** New hotkey added to allow quick access to the MD Editor
 - Only works with the new MD Editor
 - Hovering over the "Always on" MD Editor icon will display the hotkey shortcut
 - New MD Editor hotkey functions works like the "Always on" icon
 - Navigates the users to and from the MD Editor with a quick keystroke
 - The MD Editor will remain open when navigating between the MD Editor and working in Alma

Holdings Roles and Scoping

- Ex Libris added privileges to limit who can create, edit, and/or delete holdings records by:
 - o Role:
 - Previously, all users with a cataloger role could created, edit, or deleted holdings for any library in their institution
 - Cataloging roles no longer can create, edit, and/or delete holdings records
 - Scope :
 - Roles can be scoped to the Institution or Library level
 - Library scope allows the user to create, edit, and/or delete holdings only at the library the role has been scoped to
 - Institution scope allows the user to create, edit, and/or delete holdings for all libraries in the institution
 - Roles can still be scoped to the institution level

Holdings Roles and Scoping

- Ex Libris added the following privileges:
 - PHYSICAL_INVENTORY_MANAGE prevents unauthorized users with cataloging roles from creating and editing holdings records
 - PHYSICAL_INVENTORY_DELETE prevents unauthorized users from deleting holdings records
- Roles containing PHYSICAL_INVENTORY_MANAGE privilege:
 - PHYSICAL_INVENTORY_OPERATOR
 - PHYSICAL_INVENTORY_OPERATOR_LIMITED
 - PURCHASE MANAGER
 - PURCHASE OPERATOR
 - REPOSITORY_MANAGER
- Roles containing PHYSICAL_INVENTORY_DELETE privilege:
 - PHYSICAL_INVENTORY_OPERATOR_EXTENDED
