With LearningBuilder, agencies set standards for professional development, track learners' activity, deliver assessments, eLearning, nontraditional learning or assessment measures, and report on organizational metrics.

LearningBuilder's unique strength is organizing educational and assessment into a competency model based on credentialing domains, job responsibilities, or curriculum. This framework allows the agency to build a dynamic career pathways experience for their learners.

Using LearningBuilder, learners specify their career interests, solicit supervisor feedback, identify their skills gaps, and find relevant educational activities. With these tools, learners construct a personalized learning plan to achieve their professional development goals along a career pathway that aligns with agency workforce needs.

**Not seeing value from your data?
It's an organizational problem.**

You have a data problem. Perhaps it is a 'big data' problem.

Too much data, too many silos, too few data people, and too little value from your data.

What you really have is an organizational problem, and these are merely symptoms.

Cybele can help you get your organization in line with your data, so you can get more value from it.
