What does all this mean?

Black and multi-racial households experience homelessness at higher rates than other groups.

Black households make up 14% of homeless households in the Balance of State CoC, while they make up 7.5% of Kansans. This is true for all households, youth, and veterans.

Across all CoC households, race and ethnicity does not seem to affect days spend homeless.

This is untrue in the subpopulations of youth and Veterans. Black, Native, and Indigenous youth remain homeless for longer than average. Native, Indigenous, and multi-racial Veterans remain homeless for longer than average.

What does all this mean?

■ Native, Indigenous, and multi-racial households exit to permanent destinations less often than other races.

This is true for youth households, however multi-racial Veterans exit to permanent destinations at similar rates to other races. However, Hispanic and Latino Veterans exit to permanent destinations less often than other households.

■ Black, Native, Indigenous, and multi-racial households return to homelessness at higher rates than white households.
