Healthcare Team

Lived Experiences

Why Improve?

- Pregnant persons high risk for death
 - US ranks 55th globally for maternal mortality
 - Nearly 2 pregnancy-related deaths occur every day in the US
- OB RNs, physicians, and APPs high risk for burnout
 - 35-45% RN burnout rates pre-pandemic (2019)
 - 2 in 5 CNM burnout post-pandemic (2022)
 - Burnout impacts safety and quality of care

Why Toolkits?

- Evidence-Based Practice
- Improved Patient Care
- Enhanced Safety
- Proactive Risk Management
- Streamlined Processes
- Improved Communication and Collaboration
- Empowered Healthcare Team Members & Patients

OB Sepsis and Hemorrhage Story

Always Remembered

The Bottom Line final tips and takeaways

- Outcomes and processes matter for mothers, babies, and care team members
- Toolkits and checklists support improved recognition and response to perinatal emergencies
