Dr. Richard Ohnmacht and Dr. Chad Lamendola

Overall, how is the process going?

Identification of youth/young adults
(9 Patients Identified)

Scheduling last visit with pediatrician and 1st visit with adult provider
(5 patients seen)

Patient Feedback Survey

Discuss successes and barriers

Dr. Chad Nevola

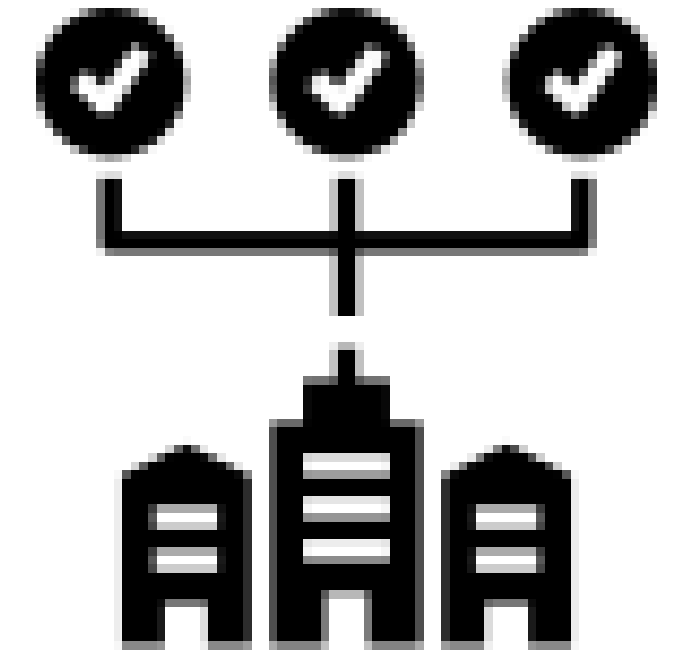

ACO/POD Annual Meeting
Presentation Jan 25, 2023

System wide survey asking
“Are you interested in a Pedi
to Adult Transition of Care?”

40 pediatric practices said yes; 50

Adult/Family Med said yes

Young adults paired with
adult practices based on

1. Geography
2. Gender preference
3. Insurance.

Preliminary Data - 8 Survey Responses

- Explain the transition process in a way that you could understand?
- Explain the changes that happen in health care starting at age 18 (e.g., changes in privacy, consent, access to health records, or making decisions)?
- Create and share your medical summary with you?
- Give you guidance about their approach to accepting and partnering with new young adults?

Yes - 87.50%

No - 12.50%

- Create and share your medical summary with you?
- Explain how to reach the office online or by phone for medical information, test results, medical records, or appointment information?

Yes - 100%

Overall, how ready did you feel to move to a new doctor?

Very - 87.50%

Somewhat - 12.50%

Discussion Questions

1. What things are most helpful in the transitions process?
 - Welcome packet/letter
 - Medical summary
 - Personalized approach
2. What would you like to see in a standardized transitions process?
3. Are there considerations to designing a widespread process?
 - Geography of providers
 - Gender
 - Insurances accepted
 - Population of focus (Hasbro)
4. Care Coordination ECHO:

What educational sessions you think would be helpful for NCM (pediatric and adult side) as adult practices bring on youth with special health care needs: foster care, guardianship, school transition, Autism, Navigating the BH system?

What would be helpful for providers: medication management (ADHD, other)?
